## **Part 2**

OAI and Peer Review Journals - the Point of View of the Commercial Publisher to OAI

## **Part 1**

A Brief Introduction to Wiley InterScience

## What is Wiley InterScience?

- A web publishing and information services business for researchers, practitioners and professionals
- A way of relating to our customers - authors, editors, researchers, libraries

## Objectives

- To deliver critical scientific and technical content to the desktops of researchers and practitioners worldwide
- To become an integral part of the work process of our users by providing tools, data and front-end access, via reference material, to the worldwide body of research literature

## Current Status - Journals

- 330 journals fully online
- 160,000 + journal articles online
- 1.5 + million pages online
- 100 titles linked to/from PubMed

## **Customers as of January 1, 2001**

- More than 5,000 institutions with active accounts
  - More than 200,000 registered users
  - More than 2 million authorized users
- More than 500,000 user sessions/month
  - More than 17,000 per day
  - More than 15,000 on the weekend

## **CrossRef Basic Facts**

- Provides the ability to link from the reference citation to the abstract (and article) regardless of publisher
- Wiley is a founding partner
- 61 participating primary publishers
- 3,080 journals and nearly 2 million article citations in database and growing

## **EarlyView**

- Articles published online in advance of compiled issue (online or print)
- Peer-reviewed, author-corrected, citable
- Unpaginated HTML model
- Paginated or unpaginated PDF model
- 79 journals for 2001 (and growing)

Online ISSN: 1096-9896 Print ISSN: 0022-3417

## **Wiley InterScience MobileEdition**

Journals on your handheld device...

Wiley InterScience  
**MobileEdition**

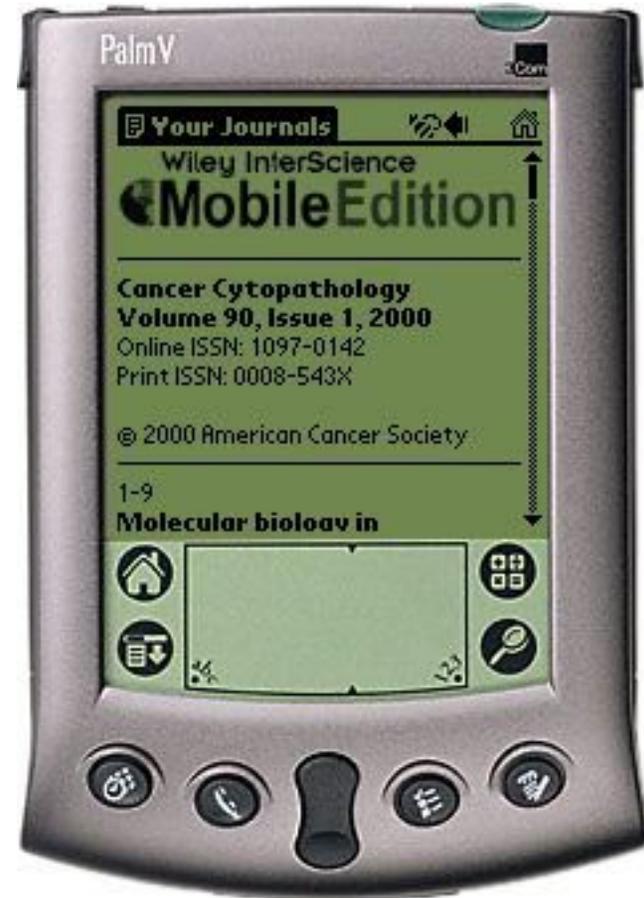

## **Wiley InterScience MobileEdition**

- Delivers journal content to handheld devices.
- In cooperation with AvantGo  
[www.avantgo.com](http://www.avantgo.com)
- Initially for *Cancer* and *Cancer Cytopathology*
- Launched 29th November 2000

## MobileEdition provides

- Full issue table of contents and abstracts for the current issue of selected journals.

## **Wiley InterScience MobileEdition - Mk 2**

- Mobile Homepage
- Journal list selected by the user.
- Choice of table of contents only or table of contents plus abstracts for each journal.
- Available 2001

## **MobileEdition**

- Articles published online in advance of compiled issue (online or print)
- Peer-reviewed, author-corrected, citable
- Unpaginated HTML model
- Paginated or unpaginated PDF model
- 79 journals for 2001 (and growing)

## ArticleSelect

- What is it?

*Individual article purchase for Enhanced Access License customers*

- Why use it?

*Provides online access to material outside licensed product set*

- When it will happen?

*Trial underway*

## ArticleSelect

- Customer holds “tokens” for articles
- Possible for applicability of tokens to be controlled
- Tokens have a lifetime of 2 years
  - Tokens not used in that time will expire*
- Access is granted for 24 hours for entire institution
  - User expected to ‘download’ the article*
  - Same license terms apply*

## **Basic Access License**

- The “default” license
- Limited features
- Tied to print subscriptions
- Terms and price NOT negotiable

## **Basic Access License Characteristics**

- Access to available back volumes of subscribed journals online. Most go back to January '97
- One concurrent user per subscription may access full text of journal content
- Unlimited number of authorized users
- Customer is limited to a single site

## **Site definition:**

A single, geographically-contiguous office building or complex or campus location plus dial-in access by Authorized Users to the Licensee's secure network, identified by the Licensee's relevant Internet Protocol (IP) addresses.

*A 'site' is not a mailing address and may include more than one library*

## **Basic Access License**

- Included in the full rate price of an annual subscription
  - No e-only access*
- License term is 1 year - automatically renewable direct or via subscription agent

## **Enhanced Access License**

- Can be customized to meet customer needs
- Important features and services only available to EAL Customers
- Print subscriptions optional
- Terms and price are negotiable

## Enhanced Access License Characteristics

- License is for electronic access only  
*print subscriptions are optional*
- Access to current year and all available back years of subscribed journals online
- Unlimited number of concurrent users as well as authorized users
- Multi-site access

## **Enhanced Access License Characteristics**

- Content may be included in shared work group files, electronic reserve rooms and in printed course packs
- Can link from locally hosted databases - homegrown and commercial
- Account manager will help with any issues and handle annual license review & renewal

## **Enhanced Access License Characteristics**

- Privacy policy protects personal/customer data - we will not divulge to 3rd parties
- Libraries are not liable for user misuse/abuse as long as they are not party to it, and notify Wiley of breaches and cooperate to rectify

## **Enhanced Access License Archiving Policy**

- After termination of the License, Wiley will provide the Licensee with access to the full text of the Licensed Electronic Journals published during the Term of the License, either by continuing online access to the same material on Wiley's server or in an archival copy in the electronic medium selected by Wiley, at a cost-based fee to be mutually agreed

## **Part 2**

OAI and Peer Review Journals - the Point of View of the Commercial Publisher to OAI

## Premises

- *Commercial publishers* with a web presence provide (either through their own portals or those of intermediaries) a value-adding means of accessing their journals' content on a commercial basis

## Premises

- The *Open Archives Initiative (OAI)* aims to 'enhance access to e-print archives as a means of increasing the availability of scholarly communication' (Source: [www.openarchives.org/faq.htm](http://www.openarchives.org/faq.htm))

## Premises

- The *key issue* around which the nature of a commercial publisher's involvement in the OAI would revolve is encapsulated in the answer to the question 'Can I use the OAI Protocol to harvest content?' at the URL cited above:

## Premises

*'The OAI Metadata Harvesting Protocol defines a mechanism for harvesting records containing metadata from repositories. The protocol does not mandate the means of association between that metadata and related content. Since many clients may want to access the content associated with harvested metadata, data providers may deem it appropriate to define a link in the metadata to the content. The mandatory Dublin Core (DC) format provides the identifier element that can be used for this purpose'*

## Premises

- Those links with OAI compliant metadata resolving to *not-for-profit content providers* may facilitate access to full text; those resolving to *commercial content providers* will afford all users access to public domain information (i.e. article abstracts, tables of contents), and restrict access to full text to licenced users.

## Observations on Premises

- Commercial publishers participating in the CrossRef initiative have already undertaken a CrossRef to DC mapping, and in principle *could* also create OAI compliant metadata.
- As well as a consideration of how the OAI protocol can be implemented, the following operational considerations would occupy any participating commercial publisher:

## Observations on Premises

- Ideally, all self-archiving authors would mark up their contributions with the correct metadata. In reality: how can universal compliance with a standard metadata set be enforced?

## Observations on Premises

- DC (even Qualified DC) doesn't deal with Serial Item and Contribution Identifier (SICI) enumeration, i.e. volume, issue, page references.

## Observations on Premises

- The DC Working Group on Bibliographic Citations (formerly chaired by Cliff Morgan, Publishing Technologies Director, John Wiley & Sons, Ltd.) recommended that journal, volume, issue and page information be included in the DC identifier. Although it was attempted to give more structure to the string by means of DC Structured Values (DCSVs), DCSVs have not to date been endorsed, leaving an undifferentiated text string.

## Observations on Premises

- CrossRef is presently actively reviewing the possibility of including OAI support in its own protocols.
- Should commercial publishers therefore view the OAI protocol as a complement to CrossRef, rather than a competitor?

## Conclusions

Commercial publishers *may* choose to deposit material into an open archive:

- **For financial reasons**, if such contributions also served to drive usage of licenced products, thereby generating traffic, increasing visibility and potentially raising revenue.
- **For reasons of expediency**, as part of a solution to digital preservation issues and contractual 'perpetual' access obligations.

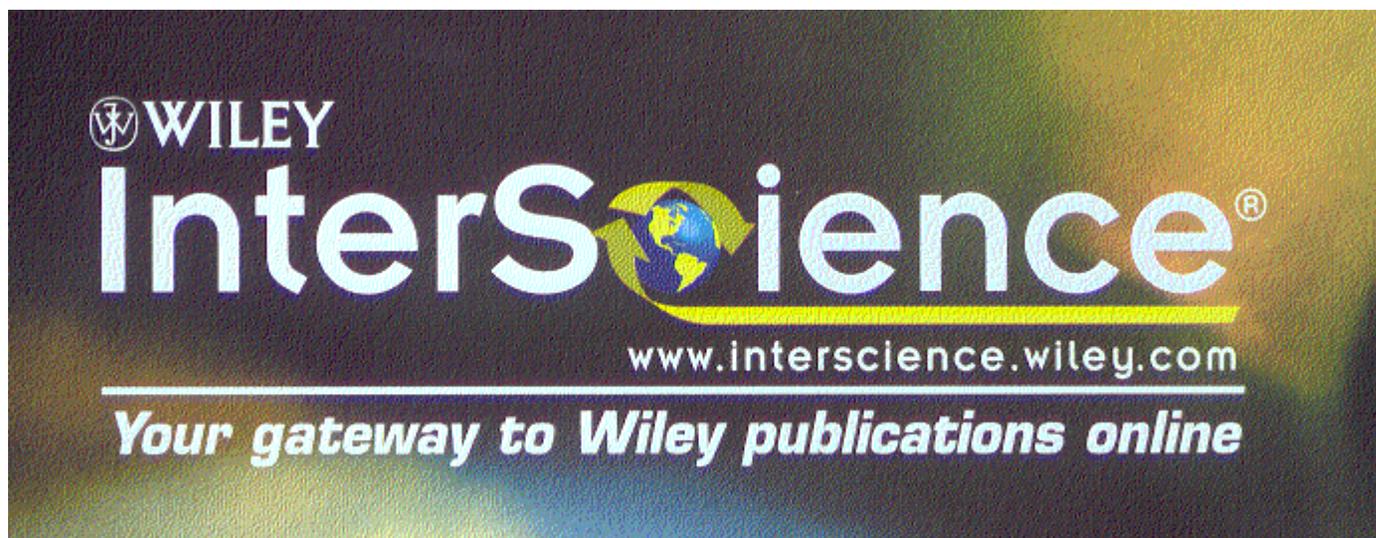

## Coda

- *‘Would a commercial publisher be willing to organise peer review for virtual e-journals as an overlay on existing e-print servers, and under what conditions?’*

## Coda

- If an author desires that an article be peer reviewed and placed in a commercial publisher's journal, then s/he is required to transfer copyright or grant an exclusive licence to the publisher to publish the work.
- At this point the article must be deleted from any other pre-print archive it may appear in, and a link inserted to the commercially published version.
- Why would commercial publishers want to manage the peer review process unless it creates a saleable product or service?

***Thanks for listening!***
