Economics of a new scholarly communication framework; who pays what?

Group # 4

Moderator: Corrado PETTENATI

Economics

☐ M1chael Jost	☐ Roland Schwaenzl
☐ Les Grivell	☐ Sauli Laitinen
☐ Josette de la Vega	☐ Ian Butterworth
☐ David Williams	☐ Andrew Spong
☐ Corrado Pettenati	☐ A Swiss chocolate box

Economics

- ☐ Major cost components
 - ☐ Certification/Review/Validation/
 - ☐ Page mark-up
 - □ Long-term archiving
- ☐ Need a precise list of costs
- □ Need for a public (National Library), reliable long-term archiving solution

Economics

- ☐ Experiments underway for free access
 - □NJP, page charge
 - □ PRSTAB, support from a few major organizations
 - ☐ JHEP and Dokumenta Mathematika, delayed paper edition

Business models

Model A

Server OAi

Page mark-up

L-T archiving

Publishers

Review / validation

Costs supported by research organizations

Costs supported by readers, via subscriptions

- + costs are closed to the interesed parts,
- + usage of available expertise
- Readers have to subscribe to a service

Model B

Server OAi

Libraries, as publishers

Page mark-up

.....

Review / validation

L-T archiving

Costs supported by Research organizations

Costs supported by the tax-payers

- + free access to all readers
- authors in healthy organization could publish more
- current "commercial" framework distroyed

Model B'

Server OAi

Page mark-up

L-T archiving

Research bodies

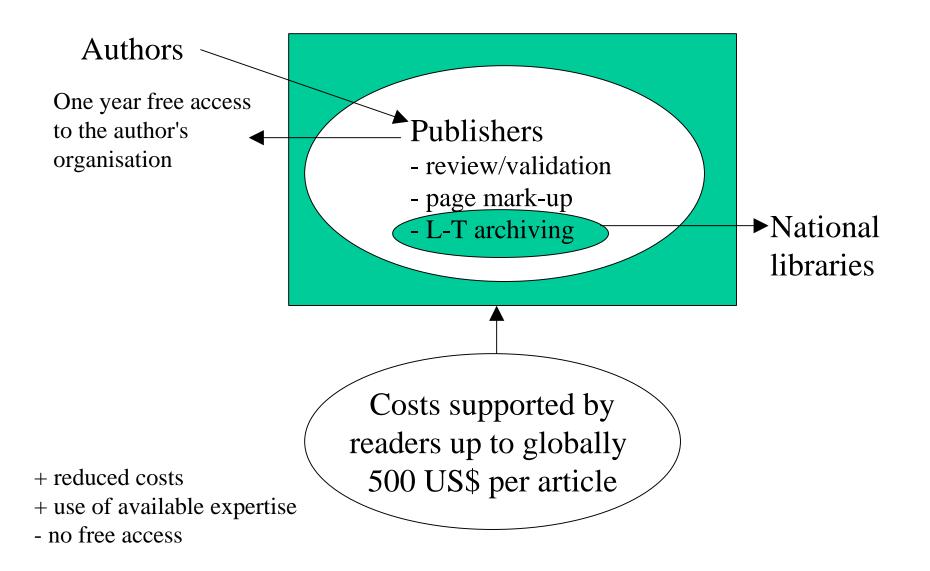

Review / validation

Costs supported by libraries

- + free access to all readers
- libraries have to support new services
- current "commercial" framework distroyed

Costs supported by tax-payers

Model C

Economics: basic agreements

- □ There is no general model
 - ☐ Business model depends on the discipline
- ☐ The business model should consider two different reader communities
 - ☐ Research community
 - ☐ Business community
 - ☐ General free access, additional services to the business community, to be defined

Economics: basic agreements

□ Low cost spontaneous initiatives in scholarly communication already have a major impact on to the "commercial" business model
