Testbed Access Rules

Sophie Nicoud

Sophie.Nicoud@urec.cnrs.fr

PTB, April 10th 2002

Goal

- Users on the DataGrid Testbed
  - Should access to several sites
  - Users **should not** register and sign rules of each sites
  - But they should know rules for the use of the DataGrid Testbed
- Sites should
  - Accept all users of the DataGrid Testbed according application
  - Enforce their own partners rules and national laws

⇒ We have to lay down the rules for use of DataGrid Testbed

  - Each users may sign these rules
  - Each sites must accept users who sign these rules

Principle rules

- The DataGrid Testbed may only be used for professional purposes
- These rules are without prejudice to application of the rules of each partners and each sites
- Any national laws which may apply
- Each sites and each partners have an security officer
- Security officer of the various partners have to collaborate to solve incidents or misuses of the Testbed
- To obtain an account for DataGrid Testbed, users have to:
  - Get a personal certificate from their own CA
  - Ask an account according to an application and be agree with the rules
  - Be registered to their VO application

Status of the document

- First draft: July 11th 2001
- Actual version on the WP6 WWW: V10 of September 15th 2001
- Last discussion with legal service of CERN: April 9th 2002
- Modifications following the discussion
  - Title, Guidelines -> Rules
  - More precise sentences about the question of the application of partner rules, site rules and national laws
  - More precise sentences to describe the persons who have access to the information stored in the Testbed computing facilities
  - Some other minor modifications about text formulation
- New version was accepted by CERN legal service: V12 on April 9th 2002 will replace the web version
