

DPF 2009**Thursday 30 July 2009****QCD I (14:00 - 18:00)**

time	[id] title	presenter
14:00	[244] Perturbative QCD for hadron collider physics: progress and applications	Mr MELNIKOV, Kirill
14:35	[420] HERA measurements on proton structure	Dr GLAZOV, Alexander
15:10	[21] Two-loop soft anomalous dimensions with massive and massless quarks	Prof. KIDONAKIS, Nikolaos
15:35	[388] HERWIRI1.0: MC Realization of IR-Improvement for DGLAP-CS Parton Showers	Dr WARD, Bennie
16:20	[27] Detection of Jets and Photons at ATLAS	FANG, Yaquan
16:45	[189] Photons plus Heavy Flavors and Double Parton Interactions in Photon plus Three-jet events in ppbar collisions at sqrt(s)=1.96 TeV in the D0 experiment	BANDURIN, Dmitry
17:10	[184] Measurement of Dijet Angular Distributions and Search for New Physics with the D0 Detector	Dr LINCOLN, Don
17:35	[187] Measurement of Differential Z/gamma+jet+X Cross Sections with the D0 Detector	LAMMERS, Sabine
