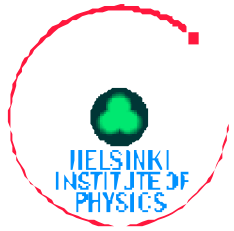
WP2 Security

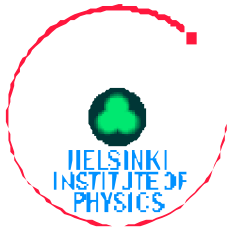


WP2 security plans until TB2.1

Helsinki Institute of Physics (HIP), May 8th 2003

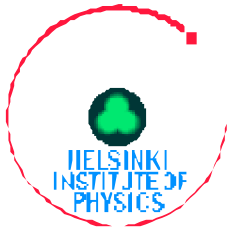
Joni Hahkala

Overview



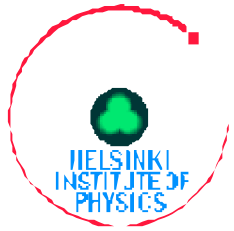
- **Delegation**
- **Authorization**
- **Multi-Proxy system**
- **Misc other stuff**

Delegation



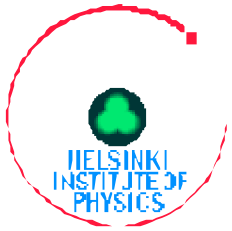
- G-HTTPS version which stores delegations into memory by 15.6.
- SOAP version later
- Testing, packaging by 15.7.
- Developer's doc and install appendix for other packages 30.7.
- Only client and dev releases needed.
- Client library or/and client command line?
- Other storages: DB, Filesystem?
- G-HTTPS additions: get-proxy and query-proxies

Authorization



- Needs packaging into developer's release by 15.6.
- Developer's doc and install appendix by 30.6.
- Covers AuthorizationManager and AdminGUI
- Need to check that everything works with WARs

Multi-proxy



- Develop current single proxy setup into service specific proxy setup by 30.6.
- Create developer's release and install appendix for services by 15.7.

Misc stuff

- Finish developer's guidifying the sec packages
- Ant install target
- EDG env variable discovery script unifying
- Continue Liberty research and prototype solution
