

H. Burkhardt, first NA31 fellow 11/1982 - 9/1985
+ NA31/Aleph Postdoc at CERN from Siegen Uni until 1990

- Working as a fellow for a, by today's standards small group NA31, lead un-bureaucratically by Heiner Wahl was a great and pleasant experience.

An example as what I remember as typical, and rather different from later experience in other groups and divisions

A weekly NA31 meeting:

- Agenda online

" Do we have an agenda ? No !
anything to discuss ?
So we will have a short meeting ! "

Followed by an open, free, typically not so short discussion and presentation of work.

Hand-written minutes, efficiently prepared by Hans Taureg were often ready at the end of the meeting !
