Type: **not specified**

Review of refinements list.

Monday 29 September 2003 14:00 (15 minutes)

We need to understand and decide what can/should/cannot be done with respect of the following issues (not yet listed in any particular order):

- Interface to 'US' flavour of RLS
- Aggressive/Conservative resubmission
- Parameterized job description.
- Unique JobID in the job Classad
- Match of VO groups in RB
- Support for unique CeID for multiple CEs serving the same queue.
- Sandbox transfer via GASS
- LB Extended queries
- Use of FTSH for the Jobwrapper
- Allowing NS to pass down an open socket (removing duplication of matchmaking in NS).
- Shared Sandbox support
- Manual resubmission of a rescue DAG using the old JobID
- Accounting-based brokering
- Advanced reservation support
- Error reporting from helpers
- Command line tools to handle LB ACLs
- WP3 monitoring script is started by JobWrapper

Session Classification: Planning until the end of the project.
