

MDI Discussion: future work and collaboration

1. inter-regional collaboration within Worldwide study framework
2. Scope and topics:
 - (IP) beam delivery, instrumentation, backgrounds
 - IR designs: xing angle, extraction, masks, collimation
 - Energy spectrometry and L(E): specs, strategy, physics analyses
 - Polarimetry: specs, upst/down polarimeters and physics analyses
 - Forward instrumentation for beam tuning and physics
 - Beam-beam simulation studies
 - 2 IRs meeting *Parameters document* specs
3. Test beams
4. DAQ implications
5. Web page and documentation/notes/references
6. Workshop?
 - topics?
 - Couple with a regional meeting in the fall?
