

# LHAPDF Interface Development

Dimitri Bourilkov

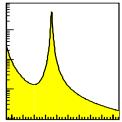

(in collaboration with Craig Group,  
Mike Whalley)

University of Florida

DESY, HERA-LHC Workshop

- P.D.F. uncertainties and the LHAPDF library version 3
- The LHAGLUE interface v3
- Checks with Drell-Yan pairs at LHC
- Outlook

e-Print Archive: hep-ph/0305126  
<http://cern.ch/bourilkov/heralhc2.{ps.gz,pdf}>

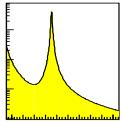

Les Houches Accord P.D.F. work with P.D.F. sets

Maintained / developed by Mike Whalley

<http://durpdg.dur.ac.uk/lhapdf/index.html>

Rich set of PDF “families” available: CTEQ,  
MRST, Fermi, Alekhin, Botje, ZEUS (new)  
More new and legacy sets available (CTEQ4,  
CTEQ5, MRST2003)

- a “fit” to the data is represented by a P.D.F. set with many members; member ZERO is the best fit, the others are used for uncertainties
- uncertainties on observables are estimated by calculating the observable for ALL members of the set (lots of CPU time!)

Developed for LHAPDF v1, now upgraded for v3,  
easier to use with each version.

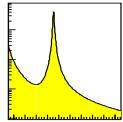

Isolate MC generators from details of LHAPDF library,  
features, names and locations of PDF sets etc.  
Use existing hooks to PDFLIB.

Interfaced to PYTHIA 6.2, HERWIG 6.5 and  
MC @ NLO 2.3

Available as stand-alone application as well

New in v3:

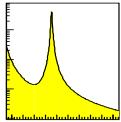

- Will come together with LHAPDF, so the user just needs to link one library.
- New 5-digit numbering scheme to accomodate legacy, new and future PDF sets.
- Option to “freeze” the PDFs at the edges of validity in  $x$  or  $Q^2$  or to extrapolate them at own risk.

# New 5-digit Numbering Scheme

D. Bourilkov

Description	LHpdf	LHgrid	Filename/Member	$x_{min}$	$Q^2_{min}$	$Q^2_{max}$
CTEQ6m (central value)	10000	10050	CTEQ6m 0	$10^{-6}$	1.69	$10^8$
CTEQ6 (40 error sets)	10001-10040	10051-10090	CTEQ6 1-40	$10^{-6}$	1.69	$10^8$

## Consistency Checks

D. Bourilkov

Cross sections with PYTHIA 6.221, Herwig 6.504;  
samples of 10000 events for each PDF member, no  
unfolding of MC errors ( $\sim 0.5\%$ )

No special care to make sure that all input  
(default) parameters are exactly the same - this is  
a technical check, NOT a detailed physics study

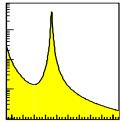

- in general good agreement between PDF sets

## Outlook

*D. Bourilkov*

---

- LHAGLUE v3 ready to go together with LHAPDF v3 (release expected soon)
- Many new and legacy PDF sets available
- Easier to use
- All PDF sets/members tested successfully
- Looking forward to user feedback
