

Session Program

7-8 May 2004

Lund Small x Workshop

Applications and experimental comparisons

DESY, 1b--3

Saturday 8 May

09:30

Applications and experimental comparisons

Session | Location: DESY, 1--3

09:30-09:45 **The problem of negative gluons and low Q₂ GVDM**

Speaker

Gunnar Ingelman

09:45-10:00

B- production at Tevatron as test of different unintegrated gluon distributions

Speaker

Nikolai Zotov

10:00-10:15 **Studies of forward jet production in DIS**

Speaker

Albert Knutsson

10:15-10:30 **Ideas to measure the uPDF**

Speaker

Magnus Hansson

10:45-11:15 **coffee**

11:15-11:30 **Production of neutral strange particles in DIS**

Speaker

Christiane Risler

11:30-11:45 **The underlying event at HERA**

Speaker

Guenter Grindhammer

11:45-12:00 **Jet ET at the LHC comparing pythia and cascade**

Speaker

Steve Magill

12:30-14:00 **lunch**

14:00
