## **Session Program**

7-8 May 2004

## Lund Small x Workshop

## Saturation, multiple scatterings and diffraction

DESY, 1b--3

## Friday 7 May

14:00-14:30	AGK cutting rules
<b>Speaker</b> Jochen Bartels	
14:45-15:00	Multiple Interactions in DIS from AGK rules
<b>Speaker</b> Henri Kowalski	
14:45-15:00	Diffractive parton distributions and absorptive corrections to F_2
<b>Speaker</b> Graeme Watt	
15:10-15:25	QCD rescatterings as a basis for soft color interaction
<b>Speaker</b> Gunnar Ingelma	n
15:25-07:25	coffee
16:00-16:30 Multiplicity equations	of heavy quark pair in \$e^+e^-\$ and the connection to BFKL and
Multiplicity	
Multiplicity equations Speaker Pino Marchesini	of heavy quark pair in \$e^+e^-\$ and the connection to BFKL and be connection to BFKL and be conservation in the Balitski-Kovchegov equation
Multiplicity equations Speaker Pino Marchesini 17:00-17:30 Speaker	of heavy quark pair in \$e^+e^-\$ and the connection to BFKL and be connection to BFKL and be conservation in the Balitski-Kovchegov equation
Multiplicity equations Speaker Pino Marchesini 17:00-17:30 Speaker Gosta Gustafsor	of heavy quark pair in \$e^+e^-\$ and the connection to BFKL and I Energy conservation in the Balitski-Kovchegov equation
Multiplicity equations Speaker Pino Marchesini 17:00-17:30 Speaker Gosta Gustafsor 17:30-17:50 Speaker	of heavy quark pair in \$e^+e^-\$ and the connection to BFKL and I Energy conservation in the Balitski-Kovchegov equation
Multiplicity equations Speaker Pino Marchesini 17:00-17:30 Speaker Gosta Gustafsor 17:30-17:50 Speaker Michael Lublinsk	of heavy quark pair in \$e^+e^-\$ and the connection to BFKL and I Energy conservation in the Balitski-Kovchegov equation Low x evolution beyond BK equation
Multiplicity equations Speaker Pino Marchesini 17:00-17:30 Speaker Gosta Gustafsor 17:30-17:50 Speaker Michael Lublinsk 18:00-18:15 Speaker	of heavy quark pair in \$e^+e^-\$ and the connection to BFKL and I Energy conservation in the Balitski-Kovchegov equation Low x evolution beyond BK equation
