

10th Workshop on Electronics for LHC and future Experiments, Boston USA

Thursday, 16 September 2004

Plenary session P4 (09:00 - 11:10)

time	[id] title	presenter
09:00	[36] Recent Results on the Development of Ultra Radiation-Hard Semiconductor Detectors for Very High Luminosity Colliders	MARA BRUZZI
09:25	[37] Advanced solid state detector technologies for particle detection	DANIELLE MORAES
09:50	[38] Pixel Multichip Module for the BTeV Experiment at Fermilab	GUILHERME CARDOSO
10:15	[39] Integration and test of ALICE SPD readout chain	ANDREA BOCCARDI
10:40	Break and poster session
