```
NA5 summary
===========

How are you planning to plan NA5 for EGEE-II.  Are you planning to
integrate more partners?
        Fotis: No

How do activities investing small fractions to eIRG charge this effort?
        Fotis/Bob: Own activity (new generic task)

Technical activities have to provide inputs (as it is done now).  Would
it be possible to estimate up-front how much effort it will correspond
too?
        Bob: We do need to identify the groups/events that we're planning
to support - e.g. concertation events, white papers.

On standardisation, where to invest more effort.  Will NA5 coordinate
this?
        Fotis: NA5 will only keep track of this.
