

Enabling Grids for E-scienceE

VOCE and P-GRADE for NA3 (and NA4)

- Requirements for more user and application development training courses than we can deliver
- Lack of t-infrastructures
- The (Genius, GILDA) training and application support service in NA3 and NA4 is a bottleneck
- Our objective in the CE region is to reduce this bottleneck of EGEE by introducing the **(P-GRADE, VOCE) t-infrastructure**
 - first in the CE region
 - and then generally for the whole EGEE community
- The first good experience: **EGEE Grid Summer School, Budapest, July 2005**
 - Large success of training VOCE and P-GRADE (at that time without connecting them)
 - Many students from the SEE-Grid region sponsored by UNESCO

- **VOCE - Virtual Organization for Central Europe**
- **To create a volunteer Grid**
- **To enable fast joining for Grid newcomers**
- **Generic application portfolio**
 - Support for a wide range of application areas
 - Incubation of new applications
- **Advantageous utilization for training purposes**
 - Functional interface with P-GRADE portal
 - Dedicated resources for a t-infrastructure
- **Better support for users**
 - Application-oriented support
 - Support of individual users and groups

- **Current status**
 - provides a complete and independent grid infrastructure
 - officially registered as the “Regional VO” for Central European region (see CIC portal)
- **Solutions provided**
 - to interconnect VOCE with **P-GRADE portal**
 - flexible framework - **CHARON system** – is available for applications & job management (see demo on Wednesday)
 - **AFS installation** available for easy integration with local national Grid projects (currently used on Czech farms & UI)
 - **parallel execution support** will be ready in very near future (weeks)

- **VOCE & specific activities**

- NA3 & NA4

- VOCE is an **application generic** virtual organization
- currently is used for computational chemistry, numerical computations, vizualizations, and astrophysics
- suitable for training purposes (especially together with the **P-GRADE portal** interface)

- SA1

- VOCE can serve as a test case for lightweight way of setting and running essential grid services in reasonable time
- utilization for **setting up of new application-centric VOs** (not necessarily in CE region only)

- JRA1

- provides feedback for middleware developers especially for IT/CZ cluster

- **Infrastructure elements overview**

- elementary infrastructure (WMS, CE, WNs, SE) fully functional and configured to accept users from CE and other regions

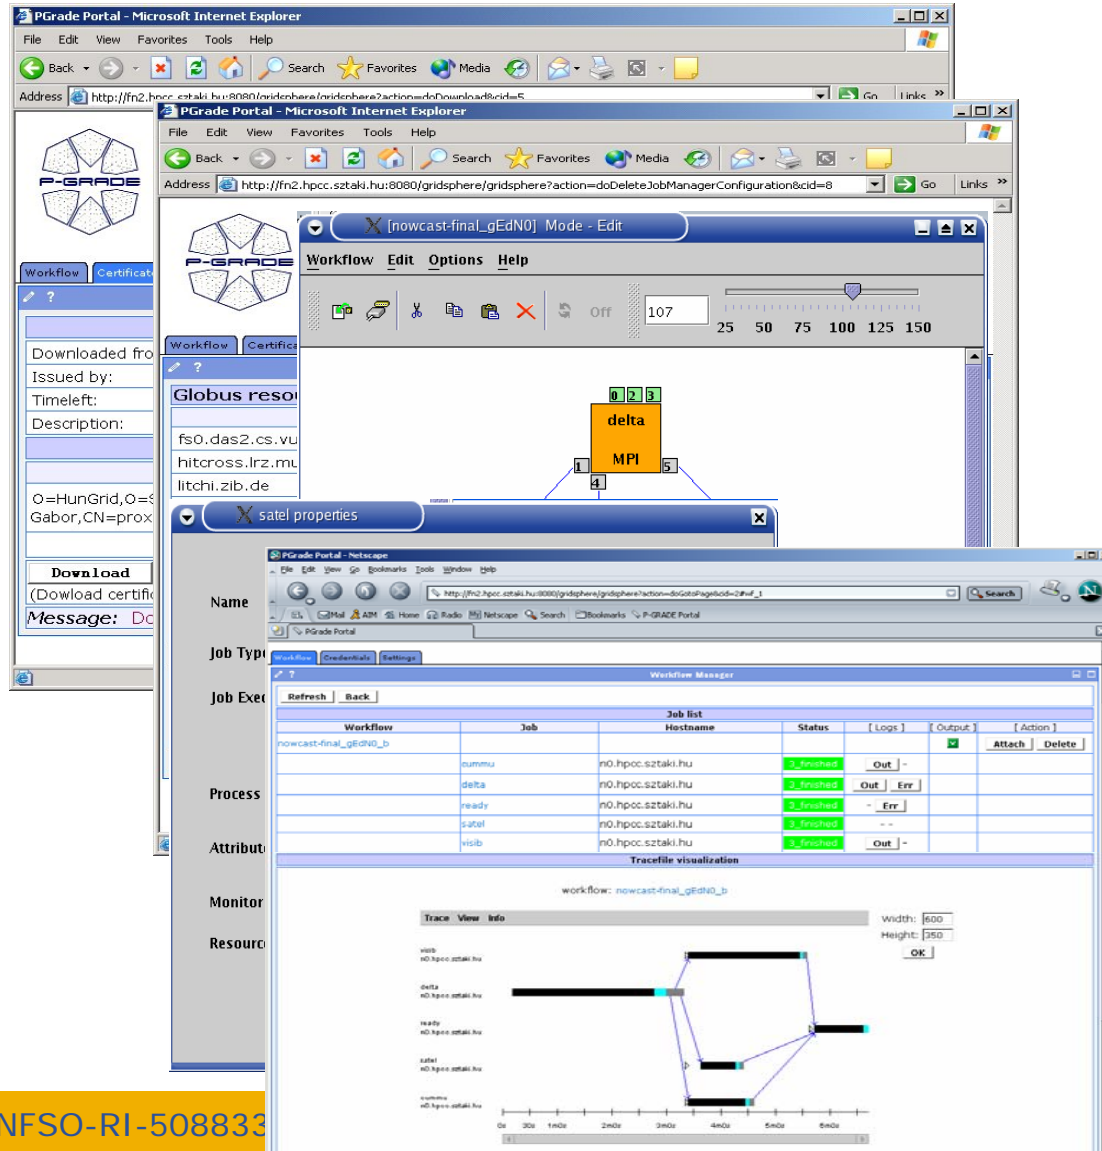

UI	skurut4.cesnet.cz
MyProxy	skurut3.cesnet.cz
RB	skurut3.cesnet.cz
VOCE LDAP	meta-ldap.cesnet.cz
VOCE VOMS	odorn.ics.muni.cz (temporary solution for tests)
GENIUS portal	https://skurut4.cesnet.cz/ (uses GILDA MyProxy server)
P-GRADE portal	hgportal.hpcc.sztaki.hu

- access to UI using GSISSH, UI account is created automatically after registration to VOCE

- **How to cope with the variety of these Grid systems?**
- **How to develop/create new Grid applications?**
- **How to execute Grid applications?**
- **How to observe the application execution in the Grid?**
- **How to tackle performance issues?**
- **How to port legacy applications**
 - to Grid systems
 - between Grid systems?
- **How to execute Grid applications over several Grids in a transparent way?**

- **Fast development of Grid workflow application**
- **Various workflow components:**
 - Sequential code
 - MPI code
 - Legacy code
- **Parallel execution of workflow components in the Grid**
- **Simultaneous execution of workflow components in different Grids**
- **Monitored execution of a workflow in the Grid**
- **To port applications among Grids**

P-GRADE technology could be an answer for the users

Done Internet

Combine legacy codes with new codes inside the same workflow!

Turn any successful job into legacy code

- Access: www.lpds.sztaki.hu/pgportal
- Official portal service of
 - SEE-GRID infrastructure
 - HUNGRID infrastructure
- P-GRADE portal runs as service for
 - UK National Grid Service
- P-GRADE portal is available for
 - Hungarian ClusterGrid
 - GridLab testbed

- **Companies who are interested in commercializing P-GRADE portal:**
 - Compusys (UK)
 - GridWise (Poland)
 - Hungarian Telecom (Hungary)
 - SATYAM (India)

- Tremendous needs for NA3 to extend training activities
- Tremendous needs for NA4 to extend application support activities
- With (P-GRADE, VOCE) we can duplicate the services provided by (Genius, GILDA)
- Taking P-GRADE from SEEGRID demonstrates a real synergy and collaboration between EGEE and other EU projects
- Industrial take-up of P-GRADE demonstrates that Industrial Forum of EGEE can benefit from projects like EGEE and SEEGRID
- P-GRADE portal can also support the large data challenge experiments like ATLAS due to its
 - legacy code support and
 - Multi-Grid support
- **Live demonstration of (P-GRADE, VOCE) during the afternoon demo**
