

Enabling Grids for E-science

EGEE-II

Bob Jones

CERN

EGEE
Enabling Grids
for E-science

4th EGEE Conference

Pisa

24-28 October 2005

www.eu-egee.org

Information Society

INFSO-RI-508833

- **Aim of EGEE:**

“to establish a seamless European Grid infrastructure for the support of the European Research Area (ERA)”

- **Achievements of EGEE:**

- Exceeding almost all final goals
- Scope expanded beyond Europe

- **Transition EGEE → EGEE-II**

- EGEE conceived as first two years of four-year plan
- Services continuously available

- **EGEE-II start:**

- Full capacity from day one
- Large-scale, production-quality infrastructure
- Supporting a wide range of applications
- Staff with extensive knowledge of Grid technology

- Manage and operate production Grid infrastructure for the European Research Area
- Interoperate with e-Infrastructure projects around the globe
- Contribute to Grid standardisation efforts

- Support applications deployed from diverse scientific communities
 - High Energy Physics
 - Biomedicine
 - Earth Sciences
 - Astrophysics
 - Computational Chemistry
 - **Fusion**
 - Geophysics (supporting the Industrial application, EGEODE)
 - Finance, Multimedia
 -

- Reinforce links with the full spectrum of interested industrial partners
- Disseminate knowledge about the Grid through training

- Prepare for a permanent/sustainable European Grid Infrastructure (in a GEANT2-like manner)

- More than 90 partners
- 32 countries
- 12 federations
- ➔ Major and national Grid projects in Europe, USA, Asia

+ 27 countries through related projects:

- BalticGrid
- SEE-GRID
- EUMedGrid
- EUChinaGrid
- EELA

- **Similar structure to EGEE**

- **Increased focus on :**

- **Services:**

- New countries joining
- New activity for sw integration and testing

- **Networking**

- Increase support for applications
- Reinforce outreach, dissemination and training
 - Closer links to industry (CERN openlab project)
 - Extend coverage to all regions

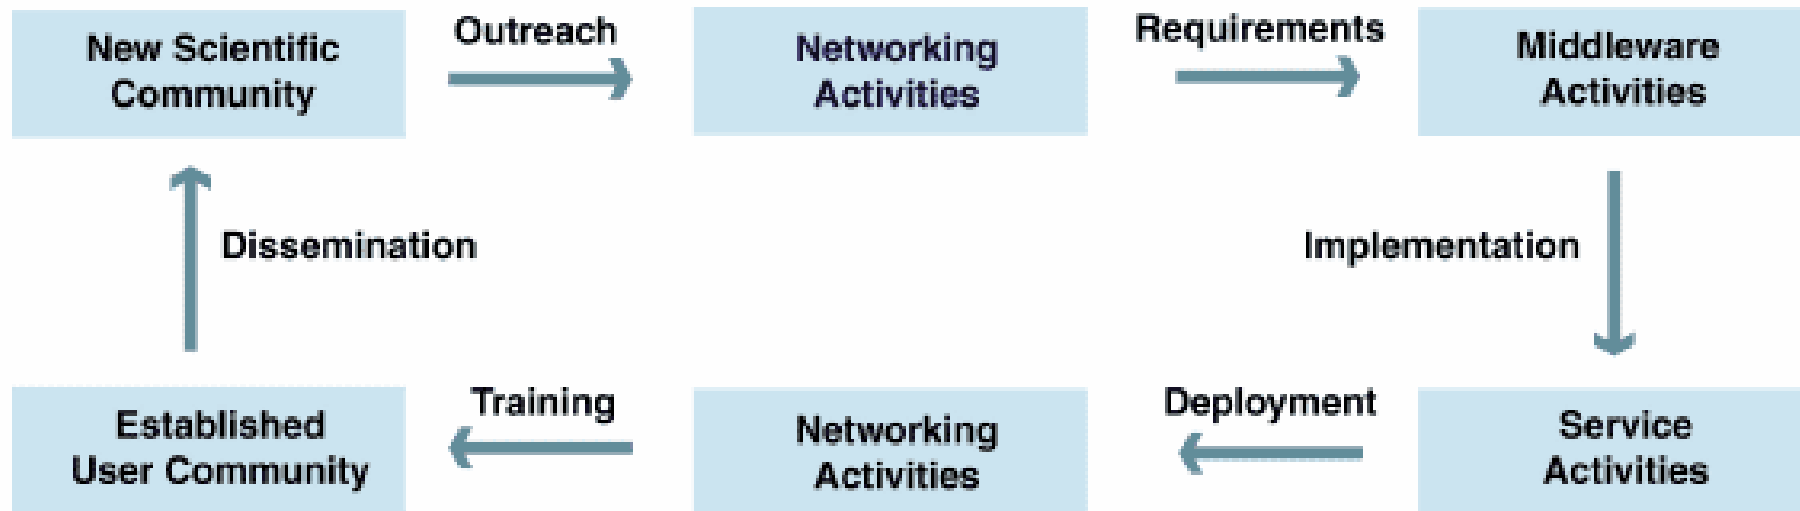

- **Coordination:**

- Technical Coordination Group (TCG)
- User Information Group (UIG)

- **Networking Activities (NA1-NA5)**
 - Management, Dissemination, Training, User support, Cooperation
 - Growth of the infrastructure user base
- **Service Activities**
 - Operate and maintain a working, sustainable infrastructure
 - **New:** SA3 – Integration, Testing and Certification
 - EGEE-II as core service provider
- **Joint Research Activities**
 - Reengineering of Grid middleware (more mature)
 - Quality Assurance for whole project
incl. Security Coordination Group (SCG)

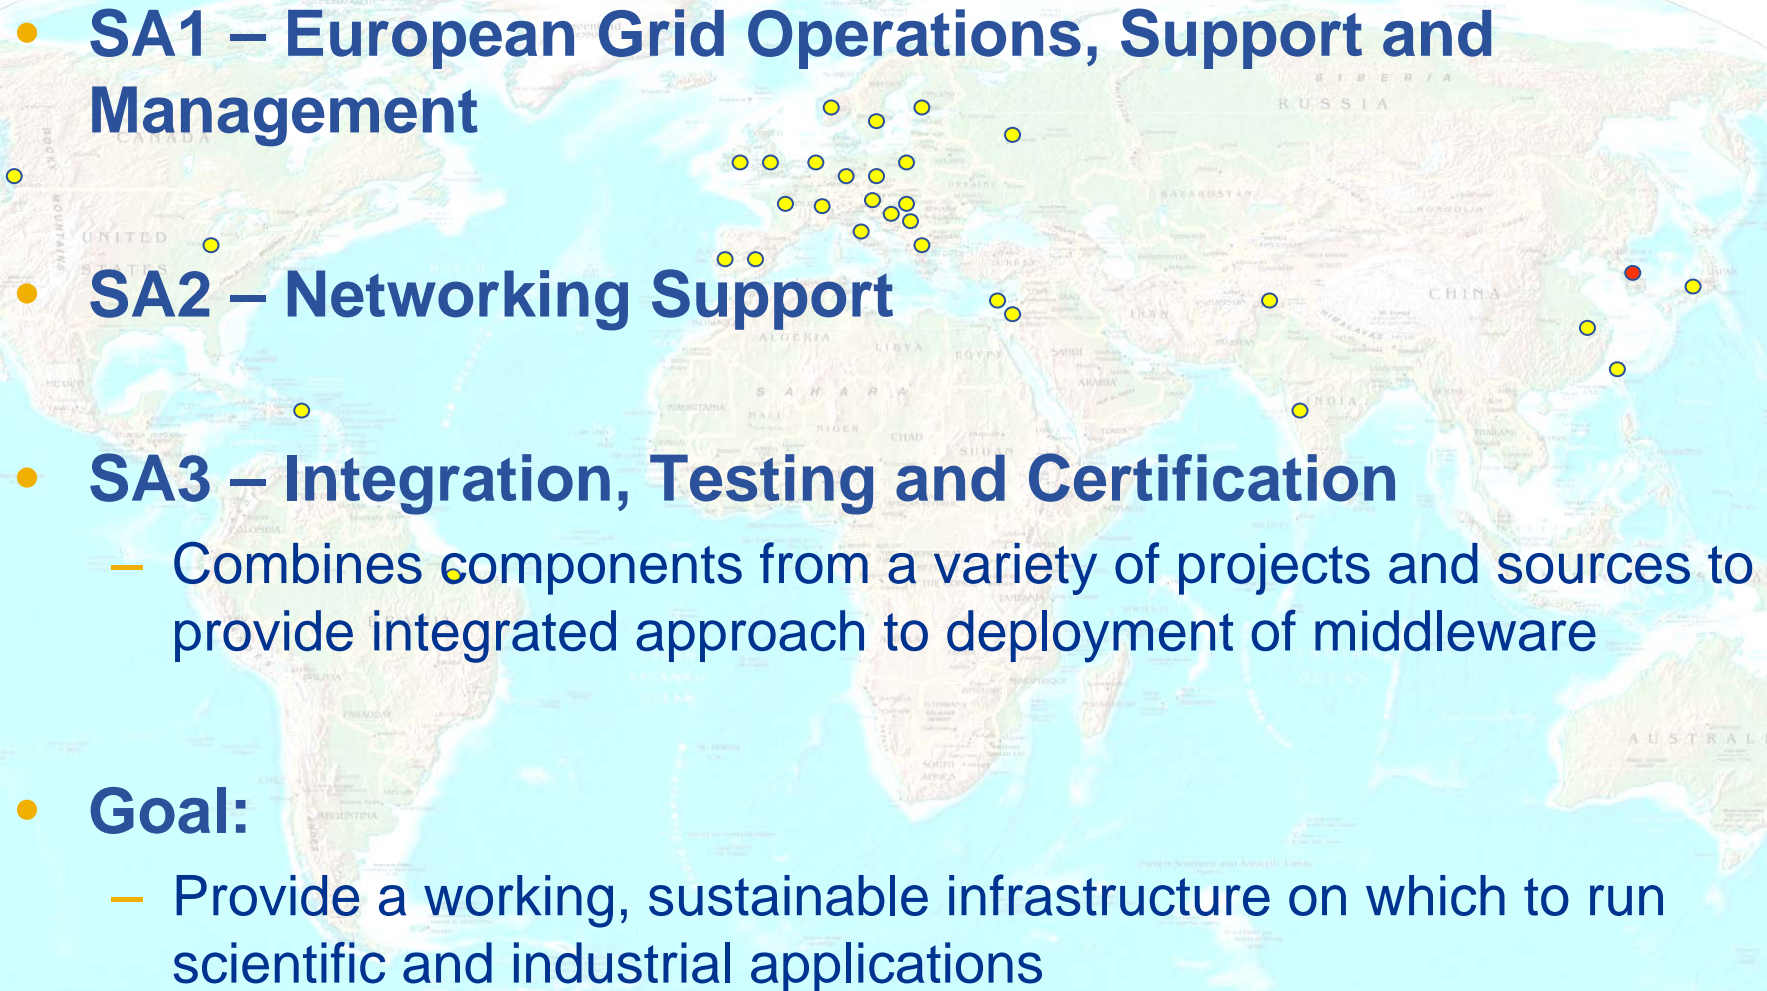

- All Activities work in concert to drive the **Virtuous Cycle**
- *Field-tested* and refined during EGEE

- **NA1 – Project Management**
- **NA2 – Dissemination, Outreach & Communication**
- **NA3 – User Training and Induction**
- **NA4 – Application Identification and Support**
- **NA5 – Policy and International Cooperation**

- **Goals:**
 - To ensure proper and effective management
 - To provide dissemination of EGEE-II opportunities to wide range of potential users
 - To enable integration of new users, train and guide them
 - To promote international collaboration in and outside the EU

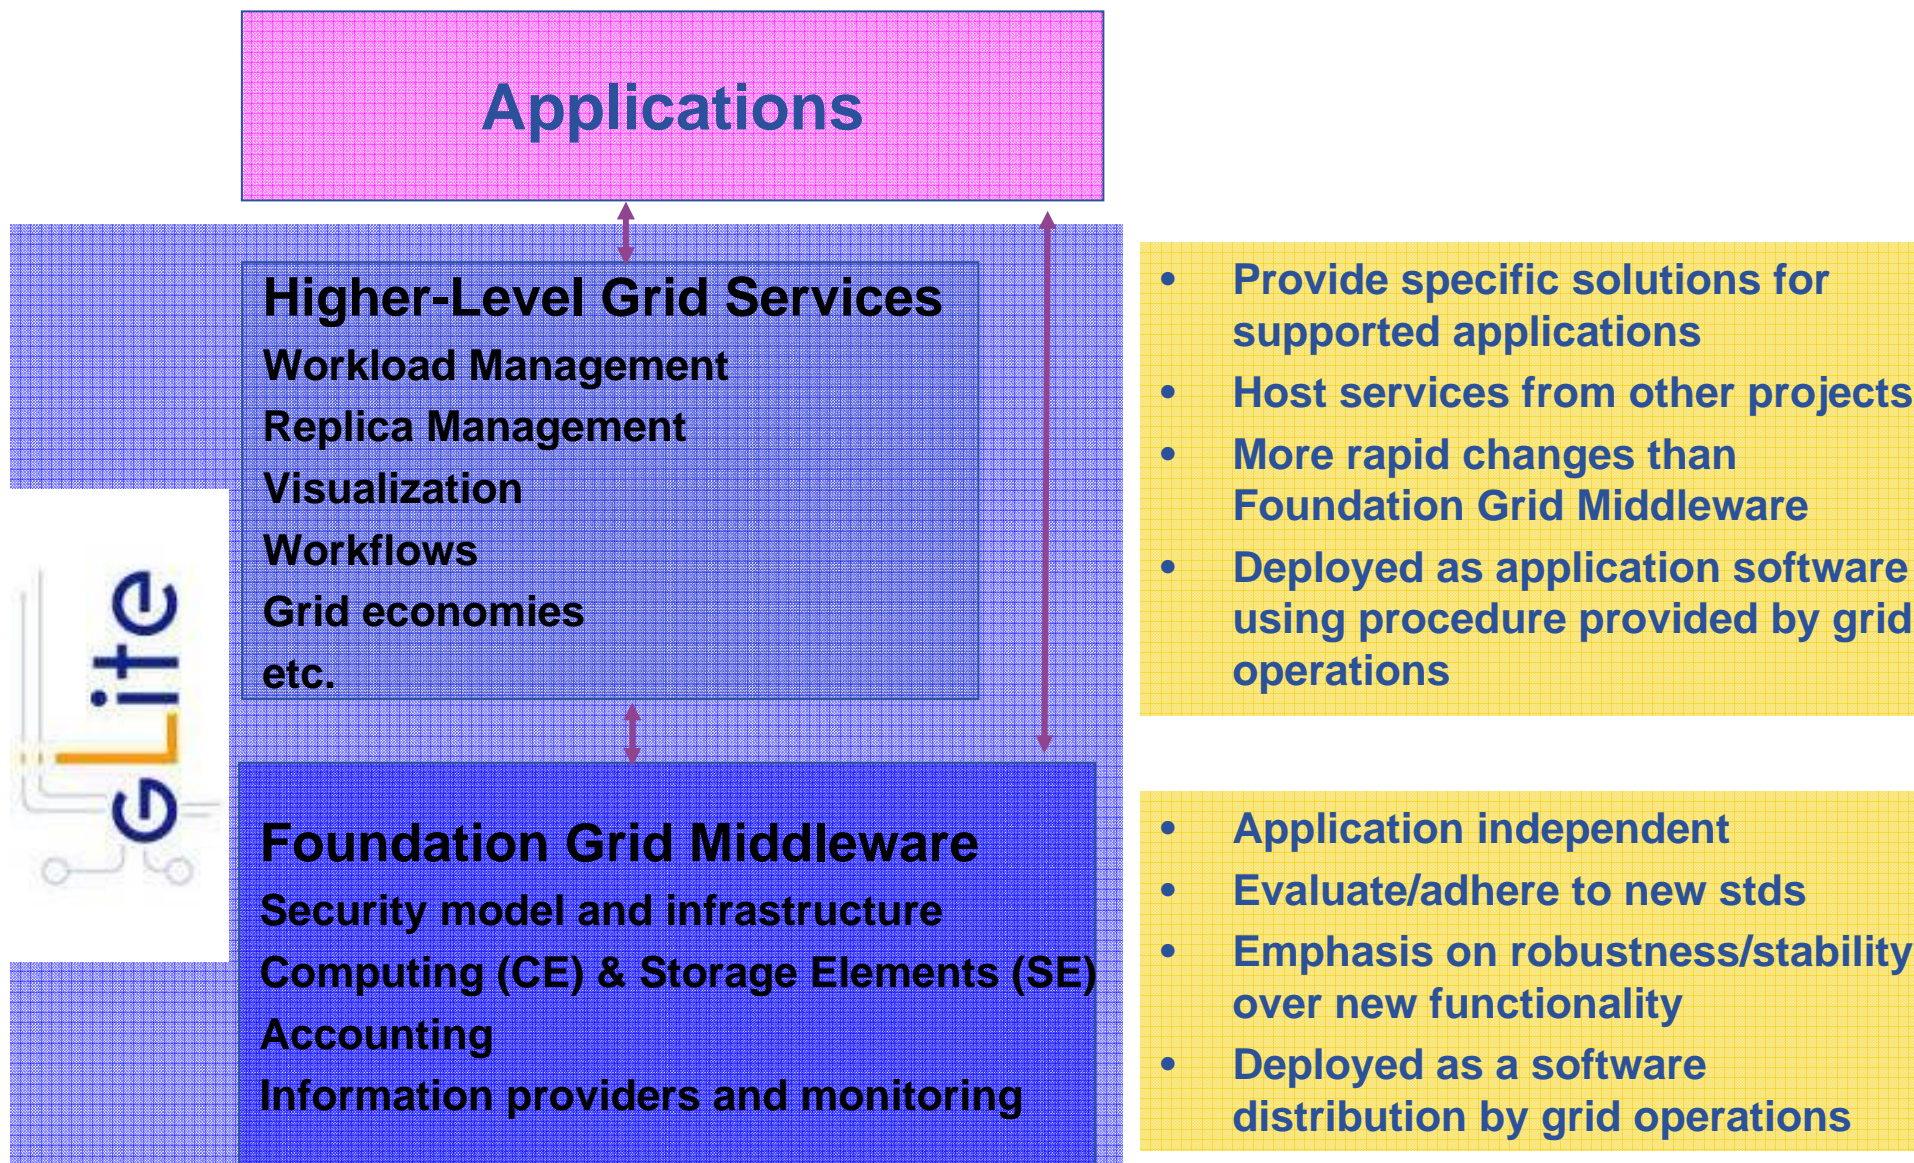

- 
- A world map with a light blue tint, showing various countries and continents. Yellow dots are scattered across the map, primarily concentrated in Europe and North America, representing service activity locations. A red dot is visible in East Asia (China). The map includes labels for major regions like 'SIBERIA', 'RUSSIA', 'CHINA', 'INDIA', 'AUSTRALIA', and 'Antarctica' at the bottom.
- **SA1 – European Grid Operations, Support and Management**
 - **SA2 – Networking Support**
 - **SA3 – Integration, Testing and Certification**
 - Combines components from a variety of projects and sources to provide integrated approach to deployment of middleware
 - **Goal:**
 - Provide a working, sustainable infrastructure on which to run scientific and industrial applications

- **JRA1 – Re-engineering of Grid middleware**
 - Shift from development to incremental improvement mode
 - Reflects the more mature status of the middleware
- **JRA2 – Quality assurance**
 - Builds on the quality process and tools of EGEE
 - Introduce partner metrics in each activity
 - Includes managing of security efforts through Security Coordination Group

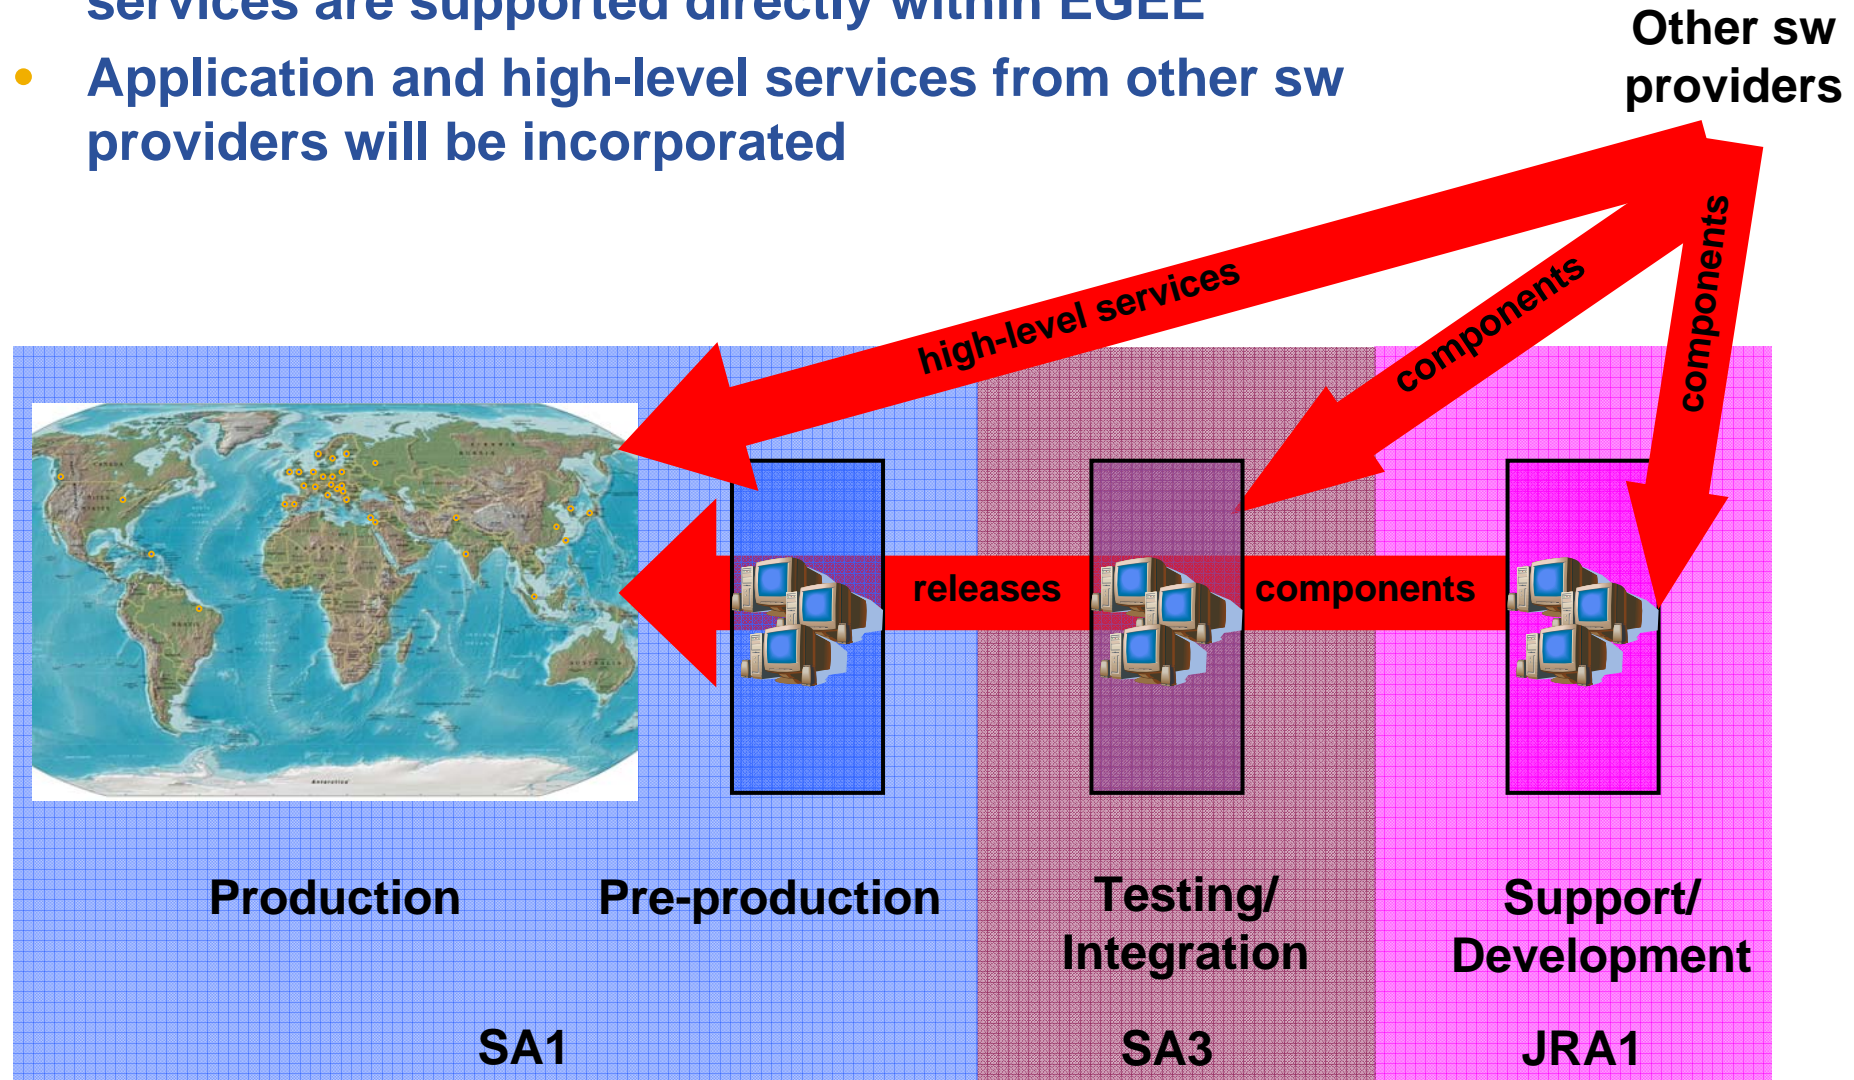

EGEE activities

JRA3: Security - in JRA1 & SA1, coordination in JRA2

JRA4: Network Research - in JRA1

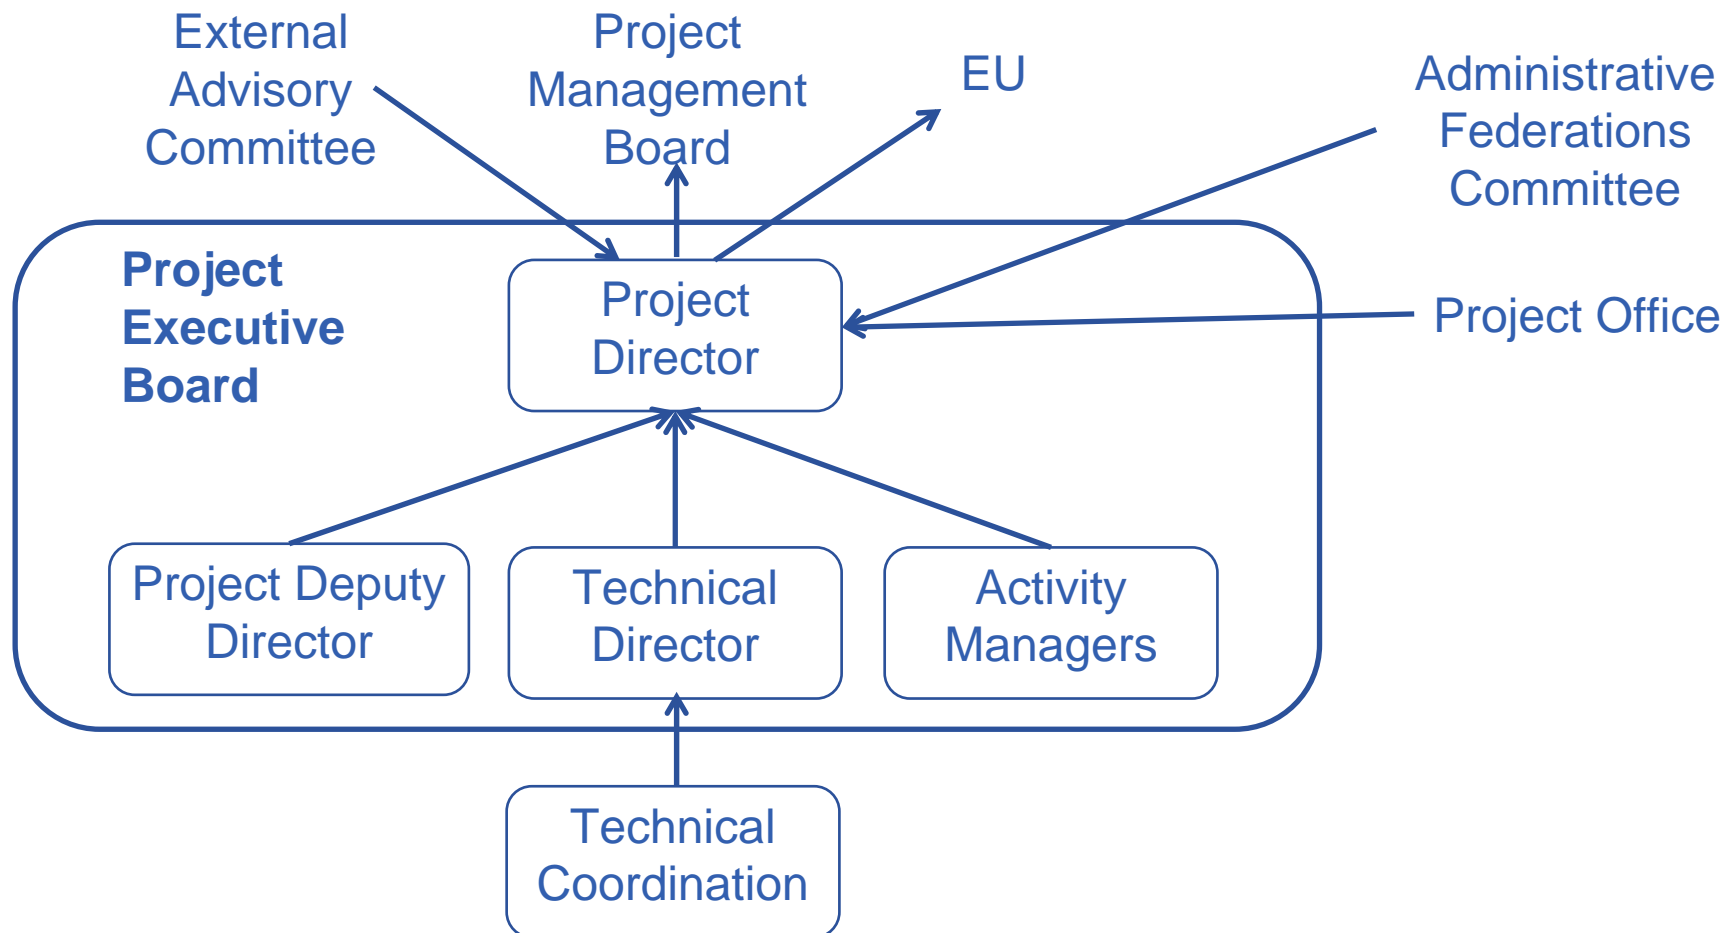

- Foundation grid middleware and selected high-level services are supported directly within EGEE
- Application and high-level services from other sw providers will be incorporated

- **Challenge: large consortium**

- Clearly defined management structure

- Clear reporting lines

- **For Industry**

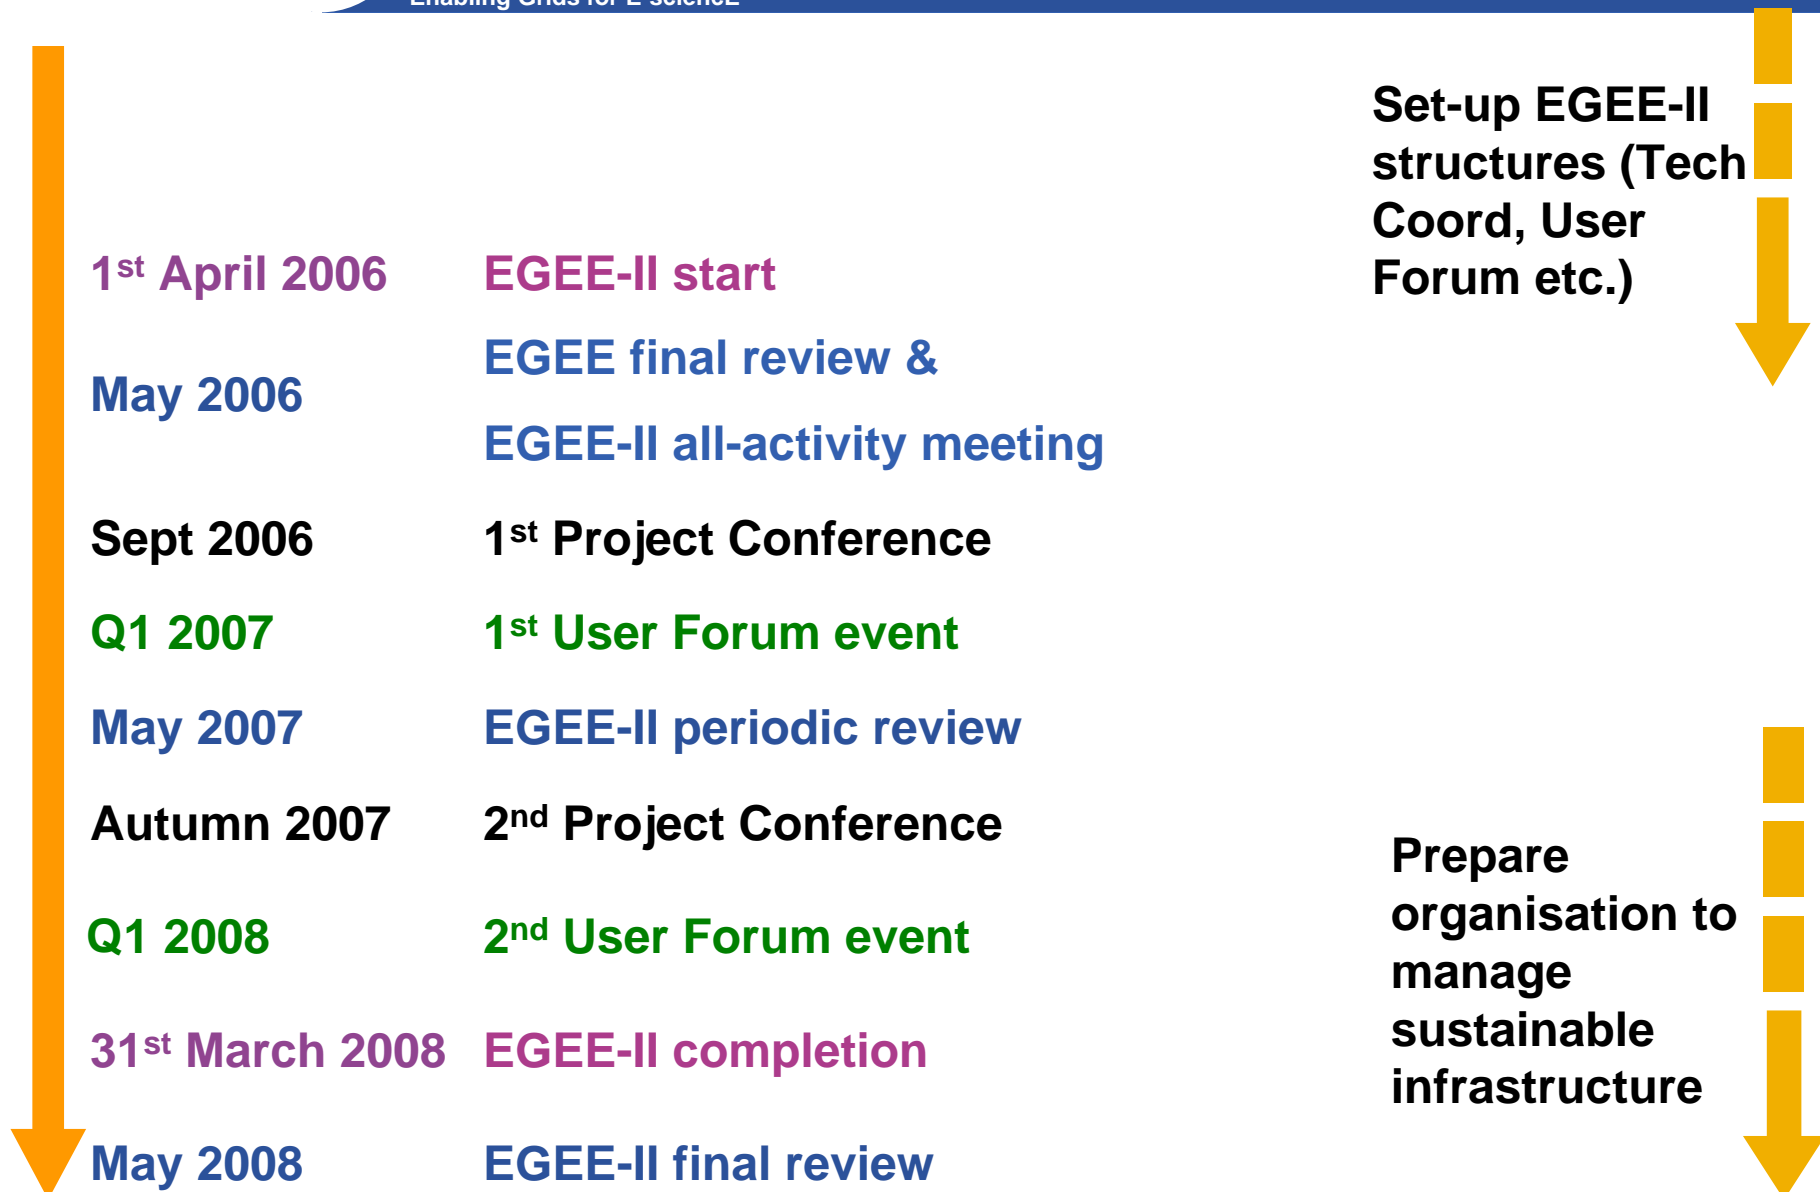

- As a partner
 - Tune the project to industrial needs and pass on knowledge
- As a user
 - R&D
- As a provider
 - Transfer knowledge on how to provide Grid services
- As affiliate
 - Industry Forum: feedback, exchange of knowledge
 - **Expanded and now in NA2**
 - **Link to CERN OpenLab project for practical work**

- **Long-term benefits to the public**

- Raising awareness of the Grid
- Early establishment of a European Grid infrastructure

- **Pisa conference**
 - Clarify exact roles/responsibilities for partners
 - New EGEE_II partners have been invited to the conference
- **Hearing meeting 7th November**
 - Respond to specific questions
- **Negotiations**
 - November to Q1 2007
 - Need to prepare Technical Annex (Description of work)
- **Consortium Agreement (CA)**
 - Update for expanded consortium
- **Contract & CA**
 - To be signed before EGEE-II start-date

But first we have to successfully complete EGEE

Pass the focused technical review in December

Pass the final review in May 2006
