

The ALICE standpoint on Baseline Services (3)

Baseline Services group meeting
Geneva, 15 April, 2005

Scope

- Discussion on CE and WMS

ALICE schema

CE/WMS

- One CE per computing centre:
 - 'Demote' the UI to interact directly with the CE (many instances needed)
 - Use AliEn agents to do this job
 - What is the dependence on the GRID provider? Same CE everywhere?
- Many CEs, hidden behind a WMS:
 - Preferred and more economical solution
