

13th RD50 Workshop

Tuesday 11 November 2008

Full Detector Systems - 40-S2-D01 (11:00 - 16:00)

time	[id] title	presenter
11:00	[20] X-Ray irradiation on p-type micro-strip detectors with p-spray and moderated p-spray isolations	BEIMFORDE, Michael
11:20	[2] Questions about extrapolation at SLHC doses of silicon parameter measured after lower fluences	CASSE, Gianluigi
11:40	[0] Measurements of CCE/IV/annealing behaviour of microstrip detectors irradiated with reactor neutrons and protons to SLHC doses	Dr AFFOLDER, Anthony
12:00	[26] Test beam results of heavily irradiated magnetic Czochralski silicon (MCz-Si) strip detectors	LUUKKA, Panja-Riina
12:20	Lunch	
13:40	[7] Status of the ALIBAVA readout system	Mr MARCO, Ricardo
14:00	[27] Pixel Sensor Measurements at CERN	PERNEGGER, Heinz
14:20	[29] Signal height in irradiated Silicon Pixel Detectors	ACOSTA, Jhon
14:40	[16] Production of n-in-n and n-in-p pixels on Fz and MCz silicon with CiS	MACCHIOLO, Anna
15:00	[15] Discussion: Full Detector Systems	
15:30	Coffee break
