Topics

- The suppliers' DB: few facts and figures
- Tools and information available to the ILOs
- Outlook and prospects

Suppliers' DB

Flavio Costa – 2008.09.16

[Jump to first page](#)

Few facts and figures (at 1.9.2008)

- “Suppliers” = Suppliers + companies participating to IT/PE + ...
- Suppliers’ DB = Firms information + “addresses” + activity codes
- Total “suppliers”: 22’453 (28’548 in 2005, i.e. - 21.35%; 1’022 not “core business”; 20’057c in Member States)
- Total “addresses”: 31’639
- New suppliers (2003-2007): 7’554
- Firms used (orders, payments, PEs, ITs 2003-2007): 12’564 (of which 6’564 suppliers created before 2003)

Suppliers’ DB

Few facts and figures (at 1.9.2008)

- Users: ~ 14'000 (EDH)
- “Official contributors” to the suppliers DB: buyers, ILOs, users, various FI dep. services (companies only indirectly)
- N. of “basic actions” (in 2007):
 - ◆ firms and addresses creations: 2'438
 - ◆ firms and addresses updates: 2'012(+)
 - ◆ suppressions, reorganization of 3rd parties, etc.
- Resources available: strong reduction in last years; now only ~30% FTE dedicated to operations

Issues under discussion and evaluation

1. Increase interaction of the ILOs with the suppliers' data (e.g. list participation to ITs, PEs, etc.)
2. Increase interaction of the firms: direct interaction with the suppliers' DB, registration to future tenders, alerts, etc.
3. Increase interaction of the purchasing officers (e.g. automatic proposal of firms from the suppliers' DB during preparation of the tender, etc.)

Suppliers' DB

Issues under discussion and evaluation

4. Meeting/discussion point/information sharing based on

- ◆ companies
- ◆ CERN commercial actions (tenders, contracts, etc.)

with participation (possibly within restricted areas) of ILOs, purchase officers, technical responsible CERN staff, companies

5. Possibility for the ILOs to process electronically information they already have access to (and others)
