

# LCG Service Co-ordination Meeting 18<sup>th</sup> October 2005

Present: Jamie Shiers (chair), Tim Bell (secretary), James Casey, Alberto Aimar, Thorsten Kleinwort, Gavin McCance, Piotr Nyczyk

Absent: Maria Dimou

## Introduction

## Status Review

### Deployment

- No representative of the deployment area was nominated. Jamie will follow up to find the appropriate person.

### Workload Management

- <https://uimon.cern.ch/twiki/bin/view/LCG/LcgScmStatusWms>
- The BDII midrange servers delay will be followed up by Tim
- VO pool accounts increase to 100 to workaround the increasing load to be arranged by Thorsten which we await a final architecture.

### Data Management Systems

- <https://uimon.cern.ch/twiki/bin/view/LCG/LcgScmStatusDms>
- Castor2 problems were not reported cleanly to the service managers. In future, any outage of longer than 1 hour should be reported to [it-physics-service-mgt@cern.ch](mailto:it-physics-service-mgt@cern.ch).

### Information and Monitoring Systems

- The SFT will be used to monitor the compliance with the MoU.

### Authorisation and Authentication Systems

- No representative was present.

## Any Other Business

- A network intervention for the Force10 boxes is planned for the end of month. This will provide a unification between the OPN and the CERN network which will simplify some of the routing issues encountered during the service challenges. It was proposed that this change window could also be used for some other upgrades in Oracle, FTS and LFC.
- Visits to FZK (19<sup>th</sup>, 20<sup>th</sup> October) and Lyon (14<sup>th</sup> December) have been arranged to review current status and plans.
- Next Meeting scheduled for 1<sup>st</sup> November 10:00

## Actions

What	Who	Created
Decide and inform contact of the deployment area	Jamie	18/10/2005
Increase number of VO pool accounts for production to 100	Thorsten	18/10/2005
Arrange BDII midrange servers availability which are currently blocked due to failure of stress tests	Tim	18/10/2005
Review changes required during network change window and prepare a plan so that other applications can also perform appropriate maintenance	James	18/10/2005
Update graphics for the new network structure.	James	18/10/2005
Review hardware / software required for production DMS services	Tim / Gavin	18/10/2005
Review dash board status and high level plan with area contacts	Tim	18/10/2005
