

LCG Service Co-ordination Meeting 2nd November 2005

Present: Jamie Shiers (chair), Tim Bell (secretary), Thorsten Kleinwort, Gavin McCance, Piotr Nyczyk, Maria Dimou, Harry Renshall, Maria Girone, Louis Poncet

Absent:

Introduction

Louis Poncet will be the grid deployment representative.

A large intervention occurred from Friday to Tuesday to upgrade the network configuration, some application components and move databases to RAC. The bank holiday on Tuesday caused some difficulties with the checkout and one network support contact was not reachable despite the advance planning.

The service levels during the CERN Christmas shutdown need to be defined. While a best effort service may be an option for this year, we will need to ramp up to more coverage for LHC. Harry will prepare a template so we can find volunteers.

The grid accounts were created for 100 users. The procedure was not simple but some improvements can be made in the future when the new user registration tools are available and the activity can be handed over to the VO managers.

Status Review

Deployment

No status.

Workload Management

- <https://uimon.cern.ch/twiki/bin/view/LCG/LcgScmStatusWms>
- The BDIIs are ready to be put into production

Data Management Systems

- <https://uimon.cern.ch/twiki/bin/view/LCG/LcgScmStatusDms>

Information and Monitoring Systems

- <https://uimon.cern.ch/twiki/bin/view/LCG/LcgScmStatusIs>
- Agreement to monitor each server has been arrived at for the SFT.

Authorisation and Authentication Systems

- <https://uimon.cern.ch/twiki/bin/view/LCG/LcgScmStatusAas>
- The tomcat problems were not resolved by the memory upgrade. Maria will investigate the problem further with a Tomcat expert.

Any Other Business

- The current target is to put all critical production servers on managed hardware by Christmas with FIO cover for the machines/operating system. This does not imply an application service level matching the MoU but it is a pre-requisite.
- Next Meeting scheduled for 16st November 10:00

Actions

What	Who	Created
Prepare template for Christmas shutdown support	Harry	02/11/2005
Update graphics for the new network structure.	James	18/10/2005
