

Session Program

2-8 Jul 2006

The 7th International Conference on Hyperons, Charm And Beauty Hadrons, BEACH 2006, 2-8 July, Lancaster

Session 2: B-physics - I

Lancaster University Conference Center
Physics Dept., Lancaster University, Lancaster, LA1 4YB, United Kingdom. Tel. (+44) 01524-593618,
Fax (+44) 1524-844037 - www.lancs.ac.uk/depts/physics/physics.htm

Monday 3 July

14:00

Session 2: B-physics - I

Session | **Location:** Lecture Theatre Faraday Complex

14:00-14:20

B-factories: $\sin 2\beta$ from $b \rightarrow c$ and $b \rightarrow s$.

Speaker

Marko Bracko

14:20-14:40

Recent measurements of $\sin 2\alpha$ in B-factories

Speaker

David Hutchcroft

14:40-15:00

B-factories: measurements of $\sin 2\gamma$ using Dalitz analysis.

Speaker

Alexei Garmash

15:00-15:20

Potential for precise Unitarity Triangle angles measurements in LHC.

Speaker

Marco Musy

15:20-15:45

B hadron decays to open charm production in B-factories

Speaker

Andrzej Bozek

15:45-16:05

Baryonic B meson decays in B-factories

Speaker

M.Z. Wang

16:05-16:25

Coffee break

16:25-17:05

Theory: V_{xb} from semileptonic decays

Speaker

Paolo Gambino

17:05-17:30

Current status of CKM

Speaker

Giampiero Mancinelli

18:05
