

Session Program

2-8 Jul 2006

**The 7th International Conference on
Hyperons, Charm And Beauty Hadrons,
BEACH 2006, 2-8 July, Lancaster**

***Session 5: Physics of HF hadrons, HF
production - 1***

Lancaster University Conference Center
Physics Dept., Lancaster University, Lancaster, LA1 4YB, United Kingdom. Tel. (+44) 01524-593618,
Fax (+44) 1524-844037 - www.lancs.ac.uk/depts/physics/physics.htm

Wednesday 5 July

09:00

Session 5: Physics of HF hadrons, HF production - 1

Session | Location: Lecture Theatre Faraday Complex

09:00–09:20

Renormalization group analysis in cross section of b-quark production

Speaker

Abolfazl mirjalili

09:20–09:40

HF production at MIPP/HARP

Speaker

Nickolas Solomey

09:40–10:00

Xc+ Lifetime Measurement from Selex Experiment

Speaker

Ugur Akgun

10:00–10:20

Heavy Flavour production at HERA

Speaker

Christoph Grab

10:20–10:50

Prospects for heavy flavour production cross section measurements in pp collisions at the LHC

Speaker

Dr Alex Sherstnev

10:50–11:20

break

11:20–11:40

Prospects for heavy flavour production cross section measurements in heavy ions at the LHC

Speaker

Marcello Lunardon

11:40–12:00

Heavy Flavours and JetWeb.

Speaker

Dr John Loizides

12:00
