

U.S./DOE Policies and Programs for HEP Data Preservation

Amber Boehnlein

U.S. Department of Energy
Office of High Energy Physics

DOE/HEP Policy on Data Preservation

- There isn't one.
- Software and Computing for DOE/HEP experimental programs is funded as part of the “facility”
- The details of the software and computing models, including long term access, are worked out between the experimental collaboration and host laboratory.

Here to listen and learn

- This workshop/working group provides valuable information on
 - Use cases, their viability and the technical solutions required to support those uses cases
 - Encouraging to see a range of possible uses with a range of associated costs and mechanisms and time scales.
 - The level of community interest and consensus
 - Technical solutions and their feasibility.
 - Ramifications of providing long term accessibility to data.
 - The policies and programs of other funding agencies.
