Dear colleagues,

Some minor comments on the new WLCG milestones:

OPN-2:: Please include FZK here. Our 10 Gbps-Internet connection is up and running in
production mode and we are optimistic to have a second, dedicated OPN-link to CERN via
GEANT until end of march'06. So: "CNAF and FZK on GEANT."

SC4-3:: (28.02.06) I suggest to rename this to SC4-2.

SC4-2:: (30.04.06) I suggest to rename this to SC4-3. The respective text is missing in
the spread. The original SC4-2 text was:
Service Challenge 4 Set-up: Set-up complete and basic service demonstrated, capable of
running experiment-supplied packaged test jobs, data distribution tested.

Regards,
    Holger

> Dear colleagues,
>   the latest version of the WLCG High Level and Areas milestones
> plans are available for review. The links are on the LCG Planning wiki:
>
> https://uimon.cern.ch/twiki/bin/view/LCG/Planning
>
> Please send me your feedback for next MB meeting. The goal is
> to approve the plans next Tuesday and start using them to track
> the progress of the project from January.
>
> Most of the content is unchanged. The differences from previously
> distributed versions of the plans are highlighted in blue.
>
> Best regards.
