# Update on OSG - EGEE Interoperability for the WLCG

Ruth Pordes
Fermilab
June 7th 2006

Job Submission

- OSG 0.4.1 publishing GIP information to OSG BDII.

- OSG BDII information exported to EGEE and loaded into WLCG BDII.

- CMS successfully submitting CRAB jobs to Tier-1 and Tier-2s.

- Problems in information being sorted one by one.

- Must ensure ongoing interoperability with new versions.

- EGEE-OSG collaboration on glexec & Condor-C - next steps for Pilot/Glidein jobs.
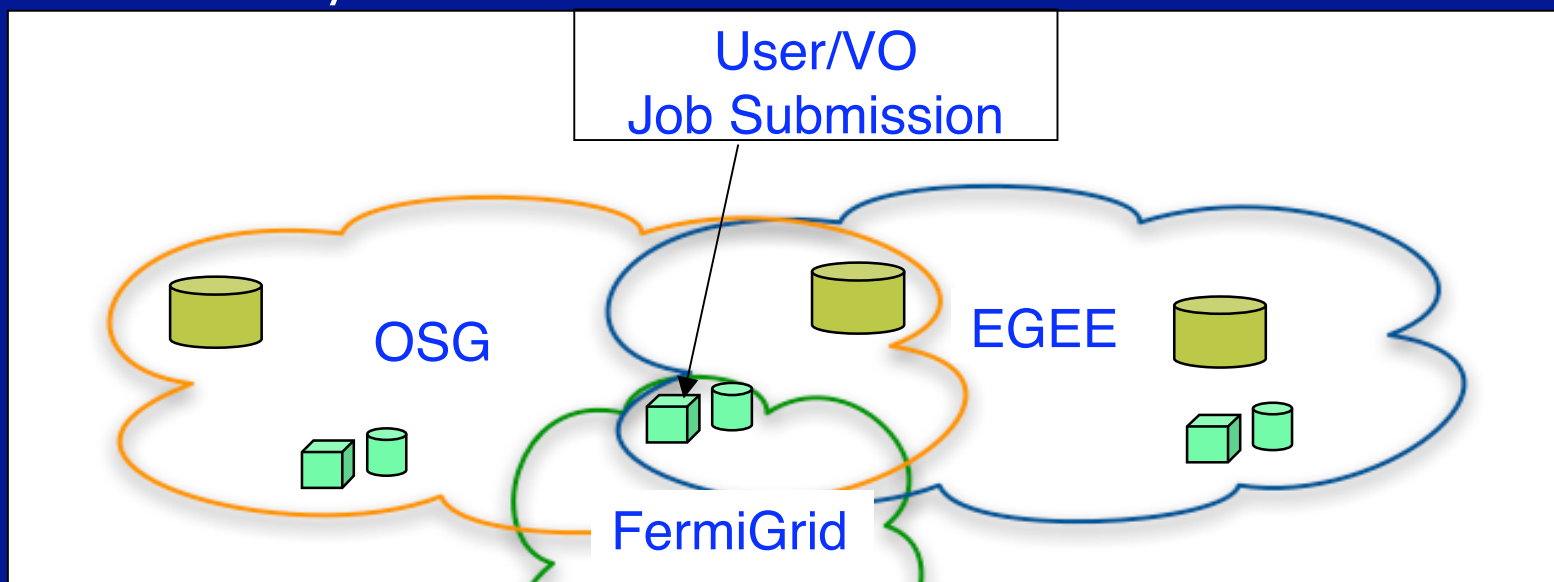

Storage Interfaces

- Data flowing between EGEE and OSG sites using SRM as well as FTS.

- SRM tester already in use for initial SRM V2.1 deployments.

- Storage Information from GIPs being debugged.

PhEDEx SC4 Data Transfers By Destinations matching 'T2'

Accounting

- EGEE - OSG agreement to publish information from meters in GGF UR format. Monthly meetings between EGEE/OSG/TeraGrid.

- Resource usage is counted multiple times - depending on audience.

- OSG Gratia being deployed on OSG in next couple of months - ready to automatically send info to WLCG.

Operations and Site Validation

- LCG Client Tools installed on request through operations or experiment VOs (e.g. CMS).

- US ATLAS, US CMS and OSG ROCs in place.

- What, how many sites, etc are recorded in the GOCDB still a matter for detailed discussion.

- Joint operations workshop on June 19th.

- Details of how to handle non-WLCG experiment VOs?

- Next Steps from talking to Laurence/Markus this week:
  - Test Plan that includes ongoing tests between EGEE-(late-)certification and OSG Integration Testbed.
  - Service discovery.
