Information Society

- **Description**
- **Installation**
- **LFC as a service**
- **Typical problems**
- **Documentation / support**

- **Description**
- **Installation**
- **LFC as a service**
- **Typical problems**
- **Documentation / support**

- **Logical File Name (LFN)**
  - An alias created by a user to refer to some item of data, e.g. `“lfn:cms/20030203/run2/track1”`
- **Globally Unique Identifier (GUID)**
  - A non-human-readable unique identifier for an item of data, e.g. `“guid:f81d4fae-7dec-11d0-a765-00a0c91e6bf6”`
- **Site URL (SURL) / Physical FN (PFN) / Site FN (SFN)**
  - The location of an actual piece of data on a storage system, e.g. `“srm://srm.cern.ch/castor/cern.ch/grid/cms/output10_1”` (SRM)

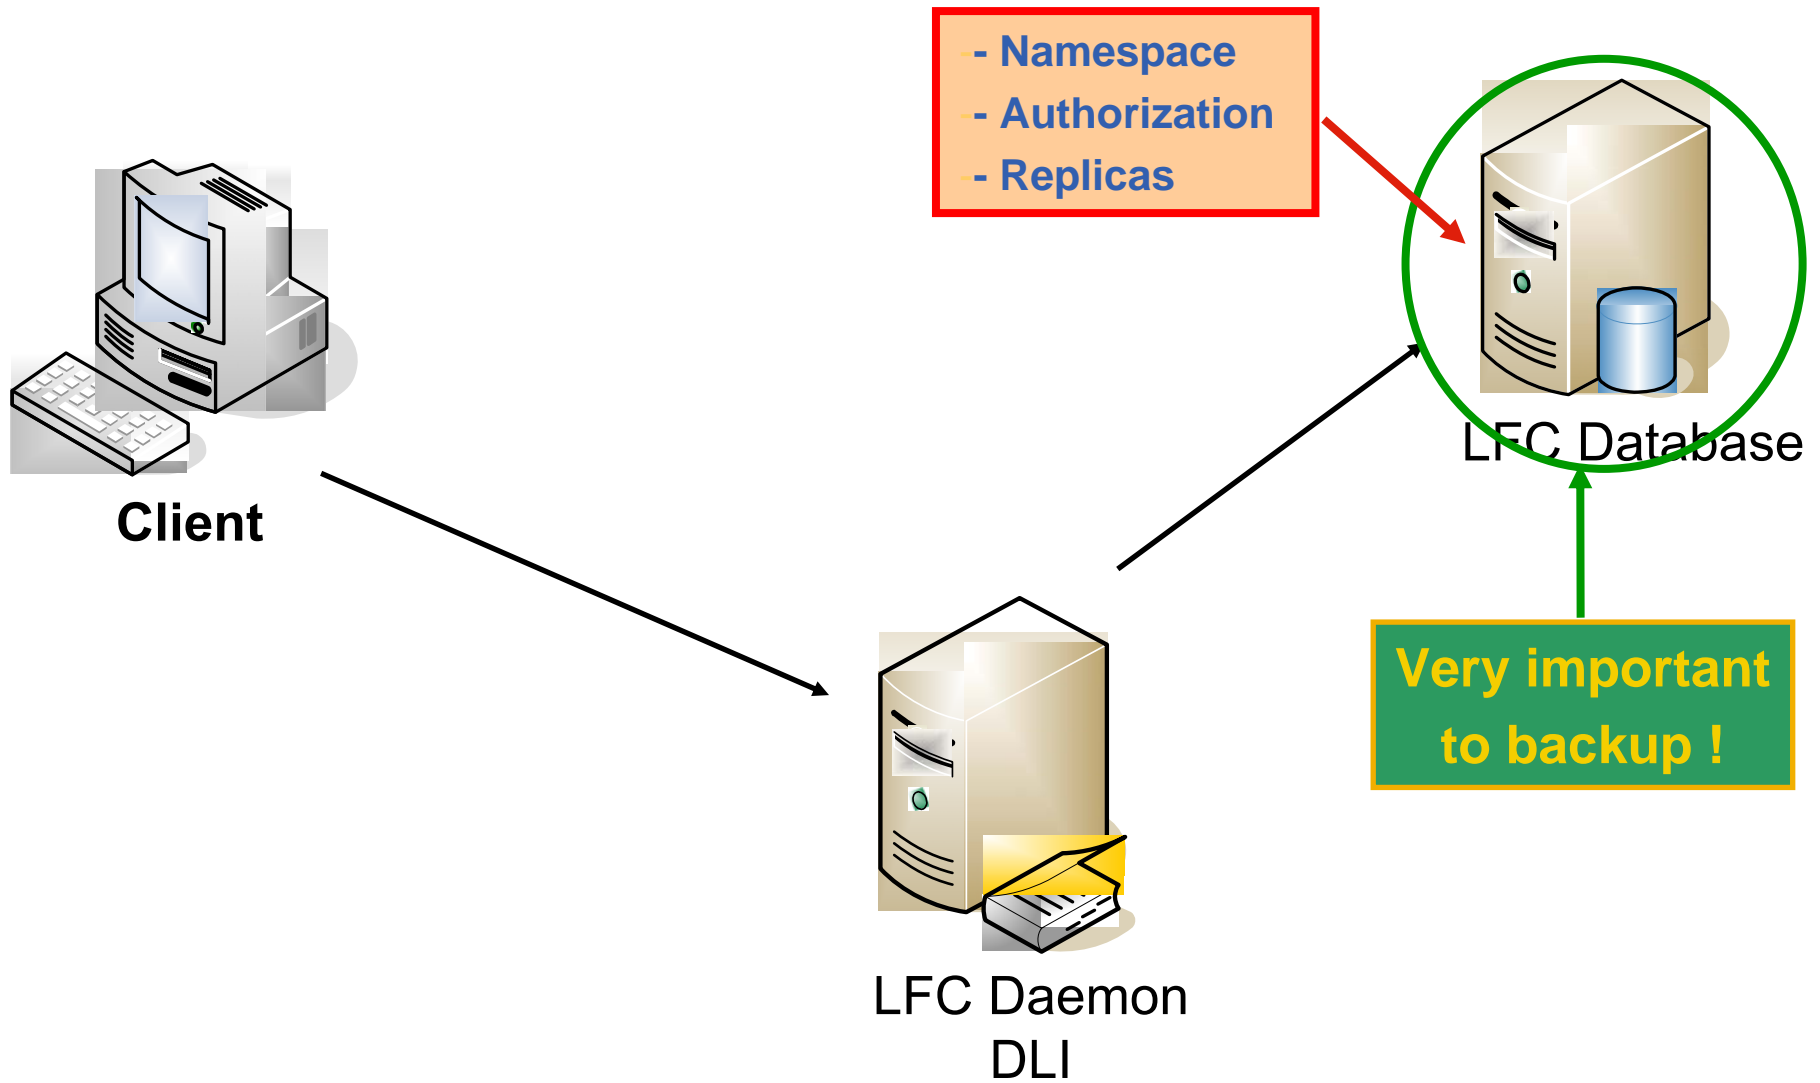

- **Hierarchical namespace**

```
> lfc-ls -l /grid/dteam/tests/tutorial
```

```
drwxrwxr-x  2 18947  2688  0   Jun 09 11:19  directory1
-rw-rw-r--  1 18947  2688 179  Jun 09 11:17  file.6008
-rw-rw-r--  1 18947  2688 179  Jun 09 11:18  file.6009
```

- **Deployment status**

- 31 central LFCs for 91 VOs, with 31 DLIs
- 62 local LFCs for 65 VOs, with 51 DLIs

- **Description**
- **Installation**
- **LFC as a service**
- **Typical problems**
- **Documentation / support**

- **RPMs provided for:**
  - **SLC3**
  - **Itanium**
  - **Mac OS X**
  
- **LFC should be able to build on:**
  - **SLC4**
  - **Other 64 bit platforms**

- 4 questions before installation:
  - For each VO, central or local LFC ?
    - Different information published
    - **same LFC server can be used for central and local LFCs**
  - For each VO, should the DLI run ?
    - DLI is insecure
    - If yes (for VO1) and no (for VO2),  
**different LFC servers have to be setup.**
  - For each VO, what is the expected load?
    - Do I need several LFC servers ?
  - Can I open port 5010 at my site ?

**How many LFC servers should be installed**

- **YAIM configuration :**

Site-info.def

\$MY_DOMAIN	
\$MYSQL_PASSWORD	\$LFC_DB
\$LFC_HOST	<b>\$LFC_CENTRAL</b>
\$LFC_DB_PASSWORD	<b>\$LFC_LOCAL</b>
\$LFC_DB_HOST	<b>\$VOS</b>

- Central LFCs:

- \$LFC\_CENTRAL

- Local LFCs:

- \$LFC\_LOCAL + \$VOS not listed in \$LFC\_CENTRAL

- **YAIM installation :**

- ./install\_node site-info.def glite-LFC\_mysql
- ./configure\_node site-info.def glite-LFC\_mysql

- **NEW ! glite-LFC\_oracle configuration supported**

- **Used for matchmaking**
- **DLI is insecure by design**
  - because the RB is insecure
- **How to stop the DLI ?**
  - `chkconfig lfc-dli off`
  - `service lfc-dli stop`

- **LFC info provider**
  - Until YAIM 3.0.0-12: static information
  - Next YAIM version: dynamic information
    - `lcg-info-provider-lfc` called by `lcg-info-provider-software-wrapper`
  
- **What is published ?**
  - Central LFC
    - GlueServiceType: `lcg-file-catalog`
  - Local LFC
    - GlueServiceType: `lcg-local-file-catalog`
  - Central Data Location Interface
    - GlueServiceType: `data-location-interface`
  - Local Data Location Interface
    - GlueServiceType: `local-data-location-interface`
  - For all
    - GlueServiceOwner: `myVO1`
    - GlueServiceOwner: `myVO2`
    - GlueServiceAccessControlRule: `myVO1`
    - GlueServiceAccessControlRule: `myVO2`

- Port 5010 needs to be open
- Can I use another port ? Yes, but...
  - On the server:
    - Start Ifcdaemon with other port
  - In the Information System:
    - publish the different port (change info-provider yourself...)
  - On the client:
    - `export LFC_PORT=5011`
- **Warning !** 
  - The multithreaded applications have to use sessions / transactions everywhere, to guarantee that the correct port is always used

- **On the LFC server (as root)**
  - export LFC\_HOST=mylfc.domain.name
  - lfc-ls -l /grid
  - lfc-mkdir /grid/myVO/test\_dir
  - lfc-rm -R /grid/myVO/test\_dir
  
- **From a UI (as a user)**
  - export LFC\_HOST=mylfc.domain.name
  - grid-proxy-init
  - lfc-ls /grid/myVO
  - lfc-mkdir /grid/myVO/test\_dir
  - lfc-rm -R /grid/myVO/test\_dir
  - lcg-cr --vo myVO -d mySE.domain.name file:/path/to/file
  
- **Repeat with:**
  - voms-proxy-init -voms myVO

- **From a UI (as a user)**
  - Central LFCs
    - `lcg-infosites --vo myVO lfc`
  - Local LFCs
    - `lcg-infosites --vo myVO lfcLocal`

- **Description**
- **Installation**
- **LFC as a service**
  - Administration
  - Monitoring
- **Typical problems**
- **Documentation / support**

- **2 log files:**

- /var/log/lfc/log
- /var/log/lfc-dli/log

Thread #4

Log Example

```

06/08 14:34:04 8850,4 Cns_srv_mkdir: NS092 - mkdir request by
/O=GRID-FR/C=FR/O=CEA/OU=DAPNIA/CN=Maarten Boonekamp (19241,1307)
from ccwali16.in2p3.fr
06/08 14:34:04 8850,4 Cns_srv_mkdir: NS098 - mkdir
/grid/atlas/datafiles/Jimmy.evgen.EVNT.v11004205 777 22
06/08 14:34:04 8850,2 Cns_srv_listreplica: NS092 - listreplica request
by /O=GermanGrid/OU=UniMainz/CN=Stefan Rieke (19008,1307) from
lxplus017.cern.ch
06/08 14:34:04 8850,4 Cns_srv_mkdir: returns 17
06/08 14:34:04 8850,2 Cns_srv_listreplica: NS098 - listreplica
B64A34F1-AE99-DA11-95A2-001422093F22
06/08 14:34:04 8850,2 Cns_srv_listreplica: returns 0
    
```

Virtual uid, gid

Thread #2

- **Permissions/ownership**
  - `lfc-chmod`
  - `lfc-chown` (only admin can use it)
- **Virtual uid, gid**
  - `lfc-ls -l ...`
  - `lfc-enterusrmap`, `lfc-modifyusrmap`
  - `lfc-entergrpmap`, `lfc-modifygrpmap`
- **POSIX ACLs**
  - `lfc-getacl`, `lfc-setacl`
- **Secondary groups not supported yet**

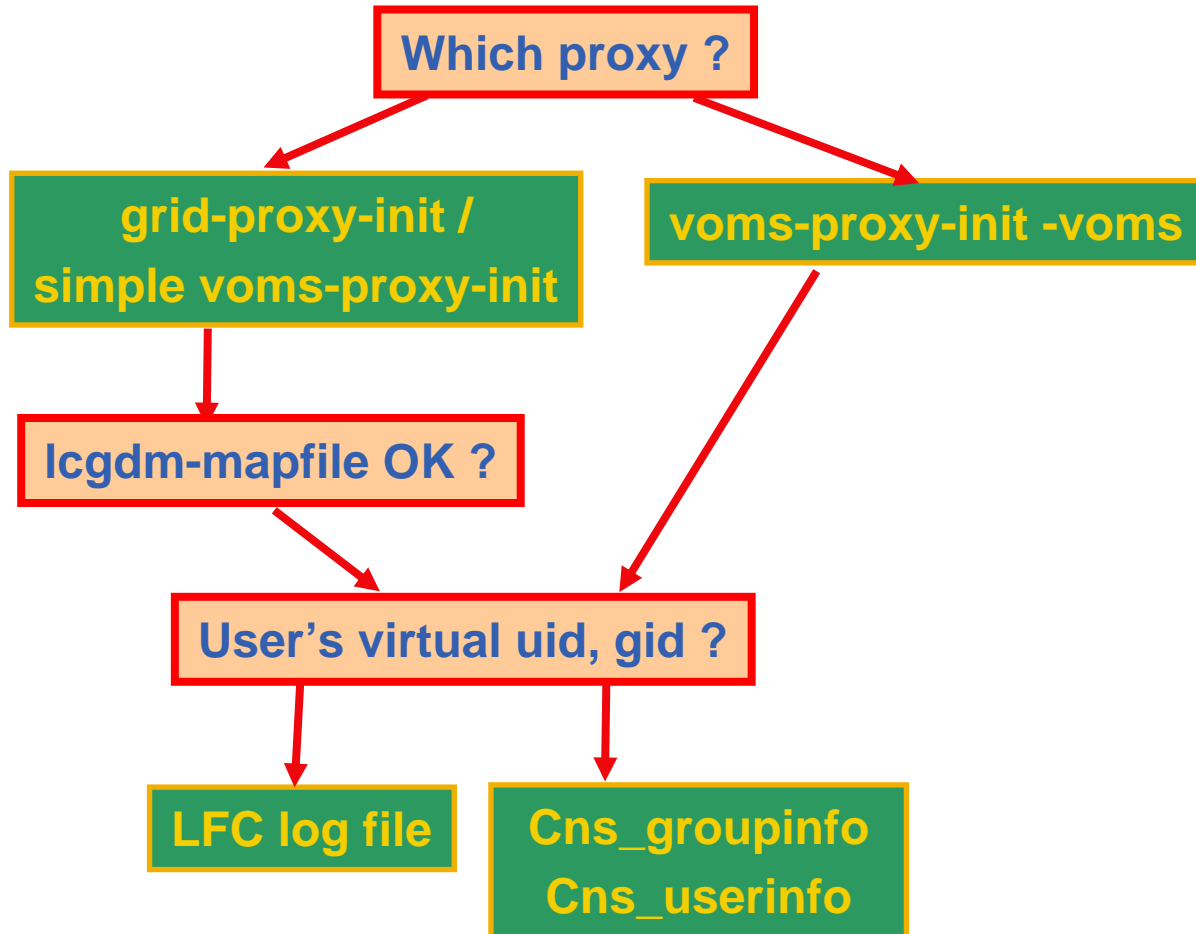

- Monitoring example (CERN):

Alarm name	Description	Comments
<b>LFCDAEMON_WRONG</b>	no <b>lfcdaemon</b> process running	
<b>LFC_DLI_WRONG</b>	no <b>lfc-dli</b> process running	
<b>LFC_DB_ERROR</b>	<b>ORA-number</b> string detected in <b>/var/log/lfc/log</b>	<b>Oracle specific</b>
<b>LFC_NOREAD</b>	can't stat given directory	<b>Ex: /grid/ops</b>
<b>LFC_NOWRITE</b>	can't utime on file	
<b>LFC_SLOWREADDIR</b>	excessive time taken to read given directory	<b>Time &gt; 10s</b>
<b>LFC_ACTIVE_CONN</b>	number of active connections to LFC	use <b>netstat</b>

- **Description**
- **Installation**
- **LFC as a service**
- **Typical problems**
- **Documentation / support**

- **Security problems**
  - Host certificate, key
  - CRLs
  - `/etc/grid-security/vomsdir` doesn't contain VO VOMS server
- **Permissions problem**
- **“Invalid Argument” error in lcg\_utils**
  - Incorrect information published (often)
  - **More detailed error message in LCG-2.7.0 and gLite3.0 !**
- **“File exists” error with lfc-rm**
  - This is normal : file cannot be deleted if replicas still exist

- Step 1: user's mapping

- **Step 2: check permissions on file / directory**
  - **Permissions / ownership ?**
    - lfc-ls -l ...
    - lfc-getacl ...
  - **ACLs ?**
    - lfc-getacl
- **Step 3: if needed, change them...**
  - **Permissions / ownership**
    - lfc-chmod
    - lfc-chown
  - **ACLs**
    - lfc-setacl

- Particular authorization problem
  - The LFC doesn't support secondary groups yet
  - Two different VOMS roles are mapped to two different gids
  - The same user might not be able to access his/her own file, depending on his/her VOMS credentials
- Possible solutions:
  - 1) Use ACLs
    - `lfc-setacl`
  - 2) Do not give same virtual gid to different VOMS roles : it will not be supported when migrating to secondary group support...

- **Description**
- **Installation**
- **LFC as a service**
- **Typical problems**
- **Documentation / support**
