Belief

Bringing Europe's eElectronic
Infrastructures to Expanding
Frontiers

www.eu-egee.org

- **To bridge the gap between the Industrial & Scientific Communities within eInfrastructures by**
 - Forging co-operation links between the two communities concerning eInfrastructures.
 - Raising awareness amongst industry players and policy makers (eIRG & ESFRI)
 - Delivering brainstorming events, strategic networking workshops and international conferences and exhibitions on strategic multidisciplinary topics, organised in strategic cities in Europe, in the US, in India and Latin America.
 - 1st Brainstorming workshop: Linz, Austria, April 11, 12
 “Future Knowledge Infrastructures – Scientific Repositories and Content Management over the Grid”,
 in conjunction with the eIRG workshop;
- **Seven international partners with complementary skills and roles: Metaware SpA, CNR – ISTI, The University of Athens, ERNET, ENGITECH, PUSP, University of Wisconsin –Madison**

- **Outcome:** An eInfrastructure 'union' committing to international cooperation for the adoption of eInfrastructure developments and applications.
- **Aim:** Natural reference point and platform for communication, knowledge sharing and international outreach for eInfrastructure projects and communities.
- **Method:** A one stop shop for eInfrastructure communities providing, Online: a digital library; search and contact facility; information on what 'everyone is doing'...and how to do it; Offline: brainstorming, networking and conferences; publications.
