Porting

Eamonn Kenny

## Dept. of Computer Science
Trinity College Dublin

Grid-Ireland Weblinks

- Grid-Ireland main porting page:
  http://grid.ie/autobuild

- Status and progress:
  http://grid.ie/autobuild/progress.html

- EGEE/LCG2 porting page:
  http://grid.ie/porting

Autobuilding Structure

How to port?

- ETICS (replace dependencies build & edg-build)
- LCG2 (when fully integrated?)
- Dependencies build (we used edg-build) https://grid.ie/autobuild/depend

Cohesive Work

- Using a common wiki to relate porting issues:
  https://grid.ie/porting/private/wiki

- Gridsite protected, already contains some information on porting LCG2/EGEE including a large dependency list.

- Better communication. Package updates.

Fixes to Ports

- ETICS needs proxy support
- Post fixes back into CVS
- Documentation on Build System
- Documented dependencies

Creating Releases

- org.glite.deployment or glite-yaim?
- Testing releases (is SFT/SAM the standard?)
- Migrating releases?
