

Report for Tier1 GridKa (FZK):  
[author : Jos van Wezel date : 2006-10-09]

#### Storage

- 4 hours mass storage interruption caused by depleted resources (database size limit, media). no activities affected.

#### Middleware

- instabilities caused by faulty routing entries causing srm transfers to fail. sft fails file replication test. routing entries fixed.
- upgrade of ssh caused jobs to fail. changed entries in /etc/ssh/sshd\_config to workaroud a fix that was introduced with the upgrade.
