

**38th INTERNATIONAL CONFERENCE  
ON HIGH ENERGY PHYSICS**

AUGUST 3 - 10, 2016  
CHICAGO

Contribution ID: 1433

Type: **Oral Presentation**

## **Education & Outreach Programs at KEK (12' + 3')**

*Saturday, 6 August 2016 15:30 (15 minutes)*

KEK has been active on many ways in education and outreaches.

We have educational programs such as science camps for graduate and high school students, delivery lectures to junior/senior high schools all over Japan and hands-on experiences for all students including international detector school like EDIT2013.

We also organise science cafe, photo exhibition, concert and lectures for general public.

We would like to introduce these programs and the impacts and discuss the improvements how to make physics, especially high energy physics, more popular in Japan.
