

**38th INTERNATIONAL CONFERENCE
ON HIGH ENERGY PHYSICS**

AUGUST 3 - 10, 2016
CHICAGO

Contribution ID: 1341

Type: **Oral Presentation**

**Update of the HL-LHC Baseline Configuration,
operation scenarios and performance projections (15'
+ 5')**

Thursday 4 August 2016 12:10 (20 minutes)

The presentation summarizes the current baseline configuration of the HL-LHC and highlights the most recent changes. Following the end of the EU funded design study the HL-LHC project published the main technical choices in form a Preliminary Design report. After the publication of the PDR, the design work was further updated in form of a Technical Design Report in 2015 and, following a cost and schedule review in 2015, the HL-LHC baseline configuration has been further revised. This presentation summaries the main changes in the configuration and discusses the current operation scenarios and performance projections.
