Atmospheric Neutrino Results from Super-Kamiokande (15' + 2')

Thursday, 4 August 2016 09:00 (17 minutes)

The latest results from the Super-Kamiokande on the topic of atmospheric neutrino oscillation will be presented. Atmospheric neutrinos cover a wide energy range, have both electron and muon flavors, and through a 3-flavor analysis are sensitive to the neutrino mass hierarchy and CP-violating phase.
