**38th INTERNATIONAL CONFERENCE
ON HIGH ENERGY PHYSICS**

AUGUST 3 - 10, 2016
CHICAGO

Contribution ID: 763

Type: **Oral Presentation**

**Search for the SM Higgs boson in VH(bb) channel
using the ATLAS detector (12' + 3')**

Thursday 4 August 2016 11:50 (15 minutes)

ATLAS results in the search for the Higgs boson in the VH production mode with the Higgs decaying to a b-quark pair will be given, using approximately 10 fb⁻¹ of pp collision data collected at 13 TeV.

Presenter: CONDE MUINO, Patricia (LIP Laboratorio de Instrumentacao e Fisica Experimental de Part)

Session Classification: Higgs Physics

Track Classification: Higgs Physics
