

ICHEP 2016 Chicago

**38th INTERNATIONAL CONFERENCE
ON HIGH ENERGY PHYSICS**

AUGUST 3 - 10, 2016
CHICAGO

Contribution ID: 473

Type: **Oral Presentation**

**Studies of jet quenching in PbPb collisions at CMS
(15' + 5')**

Friday 5 August 2016 18:00 (20 minutes)

High p_T jet and hadron studies provide experimental means to explore the energy loss mechanisms in QCD matter. CMS is particularly suitable for those measurements. In this talk, an overview of recent jet and high- p_T measurements from pp, pPb and PbPb collisions with the CMS detector will be presented. The latest CMS jet results from PbPb collisions at 5.02 TeV and the plan for future analyses will also be discussed.

Presenter: VERWEIJ, Marta (CERN)

Session Classification: Heavy Ions

Track Classification: Heavy Ions
