Performance and results of the CMS-CASTOR calorimeter in LHC Run2

Monday, August 8, 2016 6:30 PM (2 hours)

We present the performance of the CMS-CASTOR forward calorimeter during LHC Run2 data taking at a centre-of-mass energy of 13 TeV. Results on alignment and calibration are shown, together with a summary of produced physics output.

Presenter: VAN HAEVERMAET, Hans (University of Antwerp (BE))

Session Classification: Poster Session

Track Classification: Strong Interactions and Hadron Physics
