

# Quark Matter 2017

## Tuesday 7 February 2017

### Parallel Session 2.1: Initial State Physics and Approach to Equilibrium (II) - Regency A (10:40 - 12:20)

-Conveners: Sourendu Gupta; Sourendu Gupta

time	[id] title	presenter
10:40	[144] Transverse-momentum-dependent gluon distributions and their evolution towards small $x$	PETRESKA, Elena
11:00	[172] Initial conditions for hydrodynamics from weakly coupled pre-equilibrium evolution	MAZELIAUSKAS, Aleksas
11:20	[61] Characterization of the initial state and QGP medium from a combined Bayesian analysis of RHIC and LHC data	BERNHARD, Jonah
11:40	[157] Particle production in proton-nucleus collisions beyond leading order	Dr IANCU, Edmond
12:00	[411] System-size dependence of the charged-particle pseudorapidity density distribution at 5.02 TeV with ALICE	CHRISTENSEN, Christian Holm
