

Anabel ROMERO

Anabel is from Venezuela. She is currently studying Physics at the Simon Bolivar University.

During her summer at CERN Anabel has been working in the Tile Calorimeter group of the ATLAS Experiment. Her project has focused on the study of the granularity and energy resolution of ATLAS Tile Calorimeter through simulations based on Monte Carlo methods.

After her internship at CERN Anabel will finish her undergraduate studies at Simon Bolivar University and she would like to start a PhD in particle or nuclear physics.
