

Development of Nb₃Sn conductors in Japan

Tuesday, 12 April 2016 14:30 (30 minutes)

A research program to develop high J_c Nb₃Sn conductors are started in Japan in corroboration with CERN. The presentation report the research plan as well as the current status of Japanese Nb₃Sn conductor development.

Primary author: OGITSU, Toru

Co-authors: BALLARINO, Amalia (CERN); SUGANO, Michinaka; AWAJI, Satoshi (Tohoku University); NAKAMOTO, Tatsushi (KEK)

Presenter: OGITSU, Toru

Session Classification: Conductor Development: Industry contribution I

Track Classification: Superconducting Magnets
