Jet performance in Run 2 at CMS

Thursday 21 July 2016 16:15 (20 minutes)

Summary

First proton-proton collision data at a center of mass energy of 13 TeV have been collected in 2015 and 2016. We present recent results on jet energy scale calibration, jet resolution measurements, missing transverse energy, and jet substructure observables including quark/gluon/pileup jet discriminators.

Presenter: RAUCO, Giorgia (Universitaet Zuerich (CH))

Session Classification: Plenary
