

Spåtind 2016 - Nordic Conference on Particle Physics

Saturday 02 January 2016 - Thursday 07 January 2016

Skeikampen, Norway

Book of Abstracts

Contents

An introduction to GAMBIT	1
Bus from Skeikampen to Oslo (8:00)	1
Buses from Oslo to Skeikampen (time TBC, about 2pm)	1
Characterisation, plans and prospects of positronium formation in the AEGIS experiment	1
Conference dinner	1
Dark Matter Detection lecture 2	1
Dark matter detection 1	1
Dark matter seen from kimberlite pipes vulcanoes	1
Discovery strategies for new resonant and non-resonant phenomena with hadronic jets at the ATLAS detector	2
ESS / n - \bar{n} Oscillations	2
ESSnuSB: an opportunity to measure the higher leptonic CP violation signal at the second oscillation maximum	2
Early atmospheric muon rejection with PINGU - the low energy extension to IceCube . .	2
Higgs precision measurements lecture 1	2
Higgs Precision Measurements lecture 2	2
Jet Fragmentation Transverse Momentum Distributions In Proton-Lead Collisions Measured By The ALICE Experiment At LHC	3
LHC discoveries and particle physics concepts for education	3
Measuring Higgs properties in proton-proton collisions with the CMS experiment	3
Measuring pancakes in space	3
Model Building in Grand Unified Theories	3
Observational signatures of Higgs inflation	3
Particle Physics Phenomenology lecture 1	3
Particle physics phenomenology lecture 2	4

Physics concepts and education related to LHC-physics seen by a high school teacher and masterclass author	4
Physics of the Big Bang lecture 2	4
Physics of the Big Bang, lecture 3	4
Physics of the Big bang lecture 1	4
Plasmon mass in classical Yang-Mills theory	4
Proton therapy	4
QCD / heavy ions 1	5
QCD, heavy ions lecture 2	5
Radiatively Induced Fermi Scale in Grand Unified Theories	5
Search for narrow resonances decaying to dijets in proton-proton collisions with the CMS detector at $\sqrt{s} = 13$ TeV	5
Search for new phenomena in the dilepton final state using proton-proton collisions at \sqrt{s} $= 13$ TeV with the ATLAS detector	5
Search for new resonances in events with one lepton and missing transverse momentum in pp collisions at $\sqrt{s} = 13$ TeV with the ATLAS detector	5
Searches for BSM Physics lecture 1	6
Searches for BSM physics lecture 2	6
Searches for Physics Beyond the Standard Model in Monojet Signatures with ATLAS	6
Self-interacting dark matter and cosmology of a light scalar mediator	6
Study of antiproton annihilation in silicon with a hybrid pixel detector using the TimePix3 readout	6
Supersymmetry Searches with the ATLAS detector: Electroweak gauginos, sleptons and Dark Matter (aka SUSY around the corner)	6
Trials factors and the significance of the diphoton mass peaks at 750 GeV seen by ATLAS and CMS in the 2015 data	7
Wavelets	7
Welcome and reception	7
Yang-Mills condensates in Cosmology	7

Contributed talks / 38

An introduction to GAMBIT

1

Bus from Skeikampen to Oslo (8:00)

0

Buses from Oslo to Skeikampen (time TBC, about 2pm)

Contributed talks / 22

Characterisation, plans and prospects of positronium formation in the AEGIS experiment

Corresponding Author(s): lillian.smestad@fys.uio.no

56

Conference dinner

Invited talks / 46

Dark Matter Detection lecture 2

Corresponding Author(s): stephen.west@rhul.ac.uk

Invited talks / 43

Dark matter detection 1

Corresponding Author(s): stephen.west@rhul.ac.uk

Contributed talks / 32

Dark matter seen from kimberlite pipes vulcanoes

Corresponding Author(s): hbech@nbi.dk

Contributed talks / 16

Discovery strategies for new resonant and non-resonant phenomena with hadronic jets at the ATLAS detector

Corresponding Author(s): caterina.doglioni@cern.ch

Invited talks / 53

ESS / n - \bar{n} Oscillations

Corresponding Author(s): milstead@fysik.su.se

Contributed talks / 34

ESSnuSB: an opportunity to measure the higher leptonic CP violation signal at the second oscillation maximum

Corresponding Author(s): maja.britta.olvegaard@cern.ch

Contributed talks / 20

Early atmospheric muon rejection with PINGU - the low energy extension to IceCube

Corresponding Author(s): tmx877@alumni.ku.dk

Invited talks / 42

Higgs precision measurements lecture 1

Corresponding Author(s): verkerke@nikhef.nl

Invited talks / 47

Higgs Precision Measurements lecture 2

Corresponding Author(s): verkerke@nikhef.nl

Contributed talks / 19

Jet Fragmentation Transverse Momentum Distributions In Proton-Lead Collisions Measured By The ALICE Experiment At LHC

Corresponding Author(s): tomas.snellman@cern.ch

Invited talks / 57

LHC discoveries and particle physics concepts for education

Corresponding Author(s): farid.ould-saada@fys.uio.no

Contributed talks / 18

Measuring Higgs properties in proton-proton collisions with the CMS experiment

Corresponding Author(s): jaana.kristiina.heikkilae@cern.ch

Contributed talks / 26

Measuring pancakes in space

Corresponding Author(s): hansen@astro.ku.dk

Contributed talks / 37

Model Building in Grand Unified Theories

Corresponding Author(s): t.e.gonzalo@fys.uio.no

Contributed talks / 21

Observational signatures of Higgs inflation

Corresponding Author(s): vera-maria.enckell@helsinki.fi

Invited talks / 50

Particle Physics Phenomenology lecture 1

Corresponding Author(s): m.frandsen1@physics.ox.ac.uk

Invited talks / 54

Particle physics phenomenology lecture 2

Corresponding Author(s): m.frandsen1@physics.ox.ac.uk

Invited talks / 58

Physics concepts and education related to LHC-physics seen by a high school teacher and masterclass author

Corresponding Author(s): maiken.pedersen@fys.uio.no, hikingm@yahoo.no

Invited talks / 45

Physics of the Big Bang lecture 2

Corresponding Author(s): m.b.hindmarsh@sussex.ac.uk

Invited talks / 52

Physics of the Big Bang, lecture 3

Corresponding Author(s): m.b.hindmarsh@sussex.ac.uk

Invited talks / 41

Physics of the Big bang lecture 1

Corresponding Author(s): m.b.hindmarsh@sussex.ac.uk

Contributed talks / 24

Plasmon mass in classical Yang-Mills theory

Corresponding Author(s): jarkko.t.peuron@student.jyu.fi

Invited talks / 51

Proton therapy

Corresponding Author(s): brandenburg@kvi.nl

Invited talks / 44

QCD / heavy ions 1

Corresponding Author(s): rajuv@mac.com

Invited talks / 48

QCD, heavy ions lecture 2

Corresponding Author(s): rajuv@mac.com

Contributed talks / 31

Radiatively Induced Fermi Scale in Grand Unified Theories

Corresponding Author(s): alanne@cp3.sdu.dk

Contributed talks / 15

Search for narrow resonances decaying to dijets in proton-proton collisions with the CMS detector at $\sqrt{s} = 13$ TeV

Corresponding Author(s): juska.pekkanen@cern.ch

Contributed talks / 28

Search for new phenomena in the dilepton final state using proton-proton collisions at $\sqrt{s} = 13$ TeV with the ATLAS detector

Corresponding Author(s): vanja.morisbak@cern.ch

Contributed talks / 29

Search for new resonances in events with one lepton and missing transverse momentum in pp collisions at $\sqrt{s} = 13$ TeV with the ATLAS detector

Corresponding Author(s): magnar.kopangen.bugge@cern.ch

Invited talks / 49

Searches for BSM Physics lecture 1

Corresponding Author(s): freya.blekman@cern.ch

Invited talks / 55

Searches for BSM physics lecture 2

Corresponding Author(s): freya.blekman@cern.ch

Contributed talks / 17

Searches for Physics Beyond the Standard Model in Monojet Signatures with ATLAS

Corresponding Author(s): olof.lundberg@cern.ch

Contributed talks / 30

Self-interacting dark matter and cosmology of a light scalar mediator

Corresponding Author(s): ville.vaskonen@jyu.fi

Contributed talks / 23

Study of antiproton annihilation in silicon with a hybrid pixel detector using the TimePix3 readout

Corresponding Author(s): helga.holmestad@cern.ch

Contributed talks / 27

Supersymmetry Searches with the ATLAS detector: Electroweak gauginos, sleptons and Dark Matter (aka SUSY around the corner)

Corresponding Author(s): knut.oddvar.hoie.vadla@cern.ch

Contributed talks / 39

Trials factors and the significance of the diphoton mass peaks at 750 GeV seen by ATLAS and CMS in the 2015 data

Corresponding Author(s): alexander.lincoln.read@cern.ch

Both ATLAS and CMS observed small deviations from the background expectation at 750 GeV in the diphoton mass spectrum of the proton-proton collision data collected during 2015. The calculation of the trials factors that account for the look - elsewhere effect will be discussed as will a “hallway-statistics” combination of the results.

Contributed talks / 36

Wavelets
