

1st Neutrino Oscillation Tomography Workshop

Thursday 07 January 2016

Recent progress of history, structure, chemical composition of deep Earth II - Building 2, 2F, 2nd lecture room

(16:00-17:30)

time	[id] title	presenter
16:00	[28] Composition, physical properties, and thermal state of the core	Prof. OHTANI, Eiji
16:30	[24] Importance of tighter constraints on U and Th abundances of the whole Earth by Geo-neutrino determinations	NAKAI, Shun'ichi
17:00	[23] Last and next decade in geoneutrino measurements.	MANTOVANI, Fabio
