The CERN Neutrino Platform

Friday 6 November 2015 09:00 (40 minutes)

The CERN Neutrino Platform is CERN's undertaking to foster and contribute to fundamental research in neutrino physics at particle accelerators worldwide, as recommended by the 2013 European Strategy for Particle Physics. It includes the provision of a facility at CERN to allow the global community of neutrino experts to develop and prototype the next generation of neutrino detectors. It includes the active participation of CERN in Neutrino Experiments worldwide. The CERN Neutrino Platform is CERN's main contribution to a globally coordinated programme of neutrino research.

Presenter: NESSI, Marzio (CERN)
