## **Searches for dark matter in heavy-flavor final states at CMS**

*Tuesday, 5 July 2016 15:00 (20 minutes)*

Searches in CMS for dark matter in final states with invisible particles recoiling against top or bottom quarks are presented. Various topologies are explored, covering several specific dark-matter production modes. The focus of the talk is the recent results obtained using data collected at the Run-II of the LHC.
