Wed-Mo-Or19: Resistive Accelerator Magnets (10:45 AM - 12:15 PM)

-Conveners: Rüdiger Picker; Davide Tommasini

time	[id] title	presenter
10:45	A14 [A14] Twin aperture bending magnets and quadrupoles for FCC-ee	MILANESE, Attilio
11:00	P04 [P04] Design of a dipole with longitudinally variable field using permanent magnets for CLIC damping rings	TORAL, Fernando DOMINGUEZ MARTINEZ, Manuel Angel
11:15	P27 [P27] Status and realization of an high efficiency transport beamline for laser-driven ion beams	Mr SCHILLACI, Francesco
11:30	A05 [A05] Development of prototype high gradient small aperture quadrupole magnets for HEPS-TF	ZHU, Yingshun
11:45	P08 [P08] Permanent Magnet Dipoles For the ESRF Upgrade	Dr CHAVANNE, Joel
12:00	P48 [P48] Tuneable permanent magnets: Power saving solutions for the next generation of high energy accelerators.	BAINBRIDGE, Alexander
