

## Discussion on cavity beta and other design issues

*Thursday, 11 December 2008 14:15 (15 minutes)*

Other design issues:

Optimize cavity geometry w.r.t. peak fields, multipactor, robustness against Lorentz-force detuning, tunability, HOM spectra, cross-talk between cavities (from HOM or electron propagation, ...)

Identify potential contributors and deadlines

**Session Classification:** Working Group 2 - Session 1 (with WG 4)
