

Discussion session

Thursday, 11 December 2008 16:40 (20 minutes)

Potential manufacturers and required equipment

- Identify potential Labs with manufacturing competence (in house or with industry)
- Identify potential commercial manufacturers
- Agree on manufacturing and processing sequence
- Identify required equipment (e.g. field flatness, frequency tuning) and what equipment is missing

Diagnostic equipment

- Define required equipment (on-line: Temperature mapping and other diagnostics methods in super-fluid helium) and what is missing
- Define required equipment (off-line: Optical inspection system) and what is missing

Identify potential contributors and deadlines

Session Classification: Working Group 2 - Session 2
