

11th "Trento" Workshop on Advanced Silicon Radiation Detectors

Monday, 22 February 2016

Planar 1 - Amphitheatre de recherche George Charpak (16:15 - 18:00)

-Conveners: Marko Mikuz

time	[id] title	presenter
16:15	[147] Recent results with hybrid pixel assemblies for the CLIC vertex detector	NURNBERG, Andreas Matthias NURNBERG, Andreas Matthias
16:35	[148] Silicon pixel tracking detector with ultra-precise time resolution	FIORINI, Massimiliano
16:55	[149] X-rays characterisation of pixelated silicon detectors	Dr MANEUSKI, Dima
17:15	[150] The Belle II SVD Origami Modules	PALADINO, Antonio
17:35	[186] Beam test results of highly irradiated planar and 3D pixel sensors for the Phase II Upgrade of the CMS pixel detector	SCHELL, Daniel
