

## Excited QCD 2016

Contribution ID: 58

Type: **not specified**

### **QCD results in the forward region (LHCb)**

*Tuesday, 8 March 2016 10:30 (30 minutes)*

LHCb, while purpose built for b-physics, also functions as a general purpose forward detector, covering the pseudo-rapidity range 2.0 to 5.0.

A wide variety of forward QCD measurements have been performed, including jet production measurements, soft inclusive particle distributions and correlations, and central exclusive production. A selection of these results will be presented, highlighting the scope of the LHCb physics programme.
