

Excited QCD 2016

Friday, 11 March 2016

Friday Morning (08:20 - 13:05)

-Conveners: John Merritt Bulava

time	[id] title	presenter
08:30	[111] Status and perspectives of the search for eta-mesic nuclei	MOSKAL, Pawel
09:00	[76] Unitary multi-channel $\pi\pi$ scattering amplitudes of f_2 and ρ_3 mesons	NAZARI, Vahabeddin
09:30	[51] Large-N pion scattering, finite-temperature effects and the relationship of the $f_0(500)$ with chiral symmetry restoration	CORTES, Santiago
10:00	Break	
10:30	[99] Flavoured aspects of the QCD thermodynamics	KACZMAREK, Olaf
11:00	[108] Monte Carlo calculations on Lefschetz thimbles and beyond	ALEXANDRU, Andrei
11:30	mini-break	
11:35	[79] Complex Langevin in Lattice QCD: dynamic stabilisation and the phase diagram	ATTANASIO, Felipe
12:05	[110] Towards a precise and accurate non-perturbative determination of the strong coupling constant at the electroweak scale.	RAMOS MARTINEZ, Alberto
