

# Excited QCD 2016

## Thursday, 10 March 2016

### Thursday Morning (08:30 - 12:35)

-Conveners: Diana Nicmorus

time	[id] title	presenter
08:30	[88] Hidden charm pentaquark states studied with different reactions	Prof. OSET, Eulogio
09:00	[77] Photoproduction of kaons	BYDZOVSKY, Petr
09:30	[84] Numerical study of the baryon spectrum and chiral symmetry restoration	CARDOSO, Marco
10:00	Break	
10:30	[66] Searches for Supersymmetry and Exotic phenomena with the ATLAS Detector	BENEKOS, Nectarios
11:00	[73] Studies of the SM Higgs boson and searches for BSM Higgs bosons with the ATLAS Detector	LEIGHT, William Axel
11:30	mini-break	
11:35	[75] Light-by-light scattering in ultraperipheral heavy-ion collisions at the LHC	SZCZUREK, Antoni
12:05	[90] Description of hadronic effects in weak decays of beauty mesons using covariant quark model	LIPTAJ, Andrej
